

Evolve business process as a service

faster, smarter and cheaper

Our Business Process as a Service (BPaaS) offering for Finance and Accounting delivers automation, analytics and process innovation via the latest leading edge Cloud technologies.

Transforming your finance function with Cloud

'Business Process as a Service' (BPaaS) from Atos and Xerox offers a range of Cloud services to transform finance and accounting functions.

The Global service covers 'Source to Pay', 'Order to Cash' and 'Record to Report' and can be scaled to meet fluctuating demand and workloads. Complete with industry leading intelligence products to ensure internal controls, this 'out of the box' service drives efficiency and cost savings of up to 30% throughout the business.

The service combines the strength of Xerox's global Finance and Accounting capability with Atos technology and digital skills to provide a pay-as-you-go cloud based service. It is a ready-to-go solution with low upfront costs and no requirement for additional infrastructure meaning that clients can be live in a matter of weeks. The fully configured technology platform leverages the advanced functionality of the Oracle ERP Cloud Solution to drive productivity in the Finance function.

Understanding the challenge that companies face and the limitation of labor arbitrage models we have developed a new range of Business Process as a Service (BPaaS) offerings that allow rapid provisioning of best practice ways of working.

Our BPaaS service helps CFOs and CPOs stay ahead of the competition and address key global operational challenges through:

Cost/Value: Ensuring that optimum processes are used efficiently; reducing operational costs of finance and procurement; driving short and long term savings to self-fund future investments; creating business value (e.g. improve business metrics and reporting); removing the reliance on and cost of internal legacy systems.

Capacity: Flexible processes, models and support; rapid and scalable provisioning of services and operations for global growth.

Flexible cost structures: Converting semi-fixed costs to variable; shifting resources to higher valued activities.

Capabilities: Scalability, innovation and expertise; implementing best practices across a wide range of industries; accessing on-demand global talent pools, continuous innovation, and skills.

Enabling technology based on Cloud

Services: Pay as you go versus pay in advance; integrating with existing Cloud and on-premise services.

Controls: Identifying, monitoring and managing risk; maintaining and improving governance and internal controls; collaborative management of virtual global teams and resources; maintaining "evergreen" process/SOX documentation.

Building on established Finance and Accounting Global Professional Services

We serve clients in an extensive cross section of industries by managing the core end-to-end process areas of finance, accounting and procurement that are critical to their business:

Our latest Cloud based services cover:

- Source to Pay: Vendor Master Data, Invoice Processing, AP Payments and Query Resolution.
- Order to Cash: Customer Payment, Collections, Reporting and Customer Maintenance.
- Record to Report: Master Data Management, General Accounting and Cash Management.

all with embedded intelligence

Transformational Change

We offer an integrated suite of Finance and Accounting, Procurement and Supply Chain and Order to Cash cloud based BPO services delivering high performance business outcomes through:

- Process innovation: Leveraging principles of Lean and Six Sigma to drive process excellence.
- Change management services to support a smooth and seamless F&A transition.
- Knowledge preservation systems to enable work shadow and documentation, supplemented by screen and voice recording to provide a permanent knowledge repository
- Virtual Centers of Excellence to enable information sharing, innovation and quality improvement – providing all current and future clients with best practices collected from across industries, geographies, and experiences
- Activity-based compensation program to reward high achievers and keep the workforce motivated to pursue excellence and innovation

Cloud Based technology – to drive best practice ways of working, automation, and controls

Immediate scale when required to meet new demands, challenges and business opportunities.

No barrier to entry; if you have a browser you can use the system:

- Automatically upgraded to ensure you have the latest Oracle application technologies
- Customer access to powerful transactional business intelligence
- Workflow based document management, annotation, routing and tracking
- Recurring Transaction Manager serves as an advanced warning system to spot performance trends and facilitate improved process management
- Automated Account Reconciliation ensures timely completion of any account reconciliation type and features customized, configurable dashboards
- Standardized Metric Reporting, using data management integration platform to facilitate real-time report generation

Outsourcing some or all of your finance, accounting and procurement operations to us can help your business save money, substantially improve service levels and direct valuable resources to initiatives that generate profitable growth.
