

## TEMPPPO 6.3

### TEMPPPO 6.2.1

#### Features

#### *TEMPPPO Test Manager*

Multi user functionality for TEMPPPO Designer projects:

Now it is possible to have more than one Designer project in a test structure. In this way the users can create libraries with reusable data and include them into their individual projects.

The following screen shot shows 2 TEMPPPO Designer projects mixed up with test packages on 1<sup>st</sup> level.
