
DirX Access

Technical Training for DirX Access

DirX Access is a comprehensive, cloud-ready, scalable, and highly available access management solution providing policy-based authentication, authorization and federation for Web applications and services. DirX Access delivers single sign-on, versatile authentication, identity federation based on SAML, OAuth and OpenID Connect, just-in-time provisioning, entitlement management and policy enforcement for applications and services in the cloud or on-premise.

This course provides training for DirX Access administration. It includes the features and architecture of the product DirX Access and teaches how to setup, configure and administer the product. The course is well balanced between theoretical concepts and practical exercises.

Content

- Product overview
- Technical terms and technologies
- Access management and Web SSO
- Identity management in DirX Access
- Identity federation
