

DirX Identity Request Workflows

Training for the request and approval workflow of DirX Identity

DirX Identity provides a comprehensive, process-driven, customizable, cloud-ready, scalable and highly-available identity management solution for enterprises and organizations. It delivers overall identity and access governance functionality seamlessly integrated with automated provisioning. Features include life-cycle management for users and roles, cross-platform and rule-based provisioning in real-time, Web-based user self-service and delegated administration, request workflows, access certification, password management, metadirectory and auditing and reporting.

This course provides training for using and customizing DirX Identity's request and approval workflow capabilities. The course is well balanced between theoretical concepts and practical exercises.

Content

- Understanding Request and Approval Workflows for
 - Creation
 - Modification
 - Deletion
 - Re-approval
 - Segregation of Duties

with exercises for

- Using Variable Substitution
- Implementing an Activity
- Implementing a Java Class for Finding Participants
- Implementing Participant Filters and Constraints

Benefits for the trainees

The participants will get a detailed overview of the concepts and features of DirX Identity's request and approval workflow. They will learn how to setup, configure, deploy and monitor request and approval workflows, how to implement a workflow activity and how to implement and integrate custom extensions in DirX Identity workflows. Problems in configuration will be detected, analyzed and repaired.

Target Group

Technical consultants, system integrators, service staff, technical project manager

Prerequisites

- The participant is able to administer and work with Microsoft Windows Server 2008 or 2012.
- The participant is an experienced administrator and user of DirX Directory and DirX Identity
- The participant has successfully passed the courses DirX Directory, DirX Identity 1 and 2
- The participant is familiar with Java programming language and development tools

Teaching method

Presentations, group exercises, discussions, demonstrations

Instructors

The instructors are experienced employees of Atos or certified trainers for DirX Identity.

Duration

2 days
