## DirX Identity Project Workshop

### *Best Practice Sharing for Implementing Identity Management Solutions with DirX Identity*

The DirX Identity Project Workshop focuses on practical guidance for implementing specified identity management solutions with DirX Identity.

In addition to detailed knowledge about the functional scope of the DirX products, a suitable technical design is key to the success of a specified identity management solution.

Typically, identity management solutions tend to have a long lifetime and undergo regular revisions and extension during their lifetime. In particular for successful operations, the development of a documented, comprehensible and maintainable solution is therefore of utmost importance.

#### **Content**

- Challenges in implementing specified solutions
- Realization in distributed teams with high turnover of team members
- Definition of structures and conventions for the setup of system environments (convention over configuration)
- Implementation of maintainable and robust solutions
- Setup of a configuration management for the implemented solution
- Employment of software engineering methods
- Implementation of reusable components (for more than one project)
- Practical exercises

#### **Benefits for the trainees**

The participants will get an introduction to a DirX Identity implementation framework (Deployment Guide) that assembles proven methods and best practices from many years of IAM project implementations.

The participants will be able to do practical exercises derived from real project situations.

#### **Target Group**

Technical consultants, system integrators and project managers (with interest in technical aspects)

#### **Prerequisites**

- The participants have minimum of one year of IAM project experience
- Project experience and knowledge of the products DirX Directory and DirX Identity, e.g. by successful participation in the training courses DirX Directory, DirX Identity 1 and 2

#### **Teaching method**

Presentations, group exercises, discussions, demonstrations

#### **Instructors**

The instructors are experienced IAM consultants and have several years of experience in IAM projects.

#### **Duration**

2 days
