the Oracle ERP Cloud to your ERP Cloud

Operational Excellence through Digital Transformation

As the #1 European player in cloud, Atos can drive your digital transformation programme by deploying an Oracle Enterprise Resource Planning (ERP) Cloud to support operational excellence in your organization. With ERP Cloud including Financials, Procurement and Accounting Hub Reporting, you can increase productivity, lower costs and improve controls.

Atos is an Oracle Platinum partner with over 25 years of successful national and global deployments. Our deep knowledge of the product, integration and security allows us to offer innovative solutions, through a unique approach to Oracle ERP Cloud. With the core process knowledge of business insiders we make the journey to Oracle ERP Cloud safe, secure and straightforward. With complimentary services from building your initial business case through integration to ongoing support we make sure that it's not The ERP Cloud - it is Your ERP Cloud.

A complete solution

The Oracle ERP Cloud provides a modern, feature-rich, collaborative and highly effective solution to automate, streamline and control your financial and operational processes without the expensive hardware and systems management overhead costs. With patching and upgrades as part of

the service you can be sure that you will always be on the latest version of the software. Oracle ERP Cloud is more than a simple extension of outsourced delivery. With Atos your Oracle ERP Cloud will:

- ▶ Scale to market peaks with seamless technology resources
- ▶ Slash operational and capital IT expenditure
- ▶ Drive standard core processes across the organisation including subsidiaries and the extended community

Informed, Productive and Profitable

The Oracle ERP Cloud comes with a set of built in features that will support your business through:

- ▶ Financial reporting built around a multi-dimensional data model giving you reporting anytime, anywhere and on any device supporting a fully mobile and digital workforce
- ▶ Standardisation, automation and simplification of processes and systems including inbuilt invoice image integration and centralised payments to drive out cost
- ▶ Optimised processes which delivers improvements in employee productivity of up to 40%

- ▶ Workflow and exception processing to intelligently handle and route exceptions
- ▶ Faster closing and reporting with new tools like Close Monitor
- ▶ Functionally rich processes and reporting delivered via the cloud with minimum disruption
- ▶ Real time intelligence with systems prompts to automate and improve business processes (e.g receivables)
- ▶ Embedded social networking tools to aid collaboration between users and deliver improved efficiency in financial process such as month end close and invoice matching

Oracle ERP Cloud transforms automation and access to simplify controls, increase productivity and improve business decisions. It includes a broad suite of capabilities that are split between Financials Cloud, Revenue Management Cloud, Accounting Hub Reporting Cloud, Project Financial Management Cloud, Project Management Cloud and Procurement Cloud.

Transforming the way that processes are planned and executed will ensure your organisation runs more efficiently, meets compliance requirements and ultimately improves profitability.

Can you afford to be left behind?

Why this year?

Forrester recently highlighted that one of the top three priorities for businesses was Digital operational excellence through modern applications delivered by the cloud.

Sooner rather than later, market rivals will deploy cloud applications in order to innovate core processes, reduce costs, gain agility and escape from the resource hungry treadmill of upgrades.

The Atos Value

Atos offers you the following value added services to support your move to the Oracle ERP Cloud.

High confidence:

By producing our free of charge Atos Cloud Business Case you get a clear view of the costs and risks as well as the benefits associated with moving to Oracle ERP cloud. Our pre deployment business case is a board ready document that gives a balanced view of the exercise and will typically take two days to complete.

High reactivity:

We work in days and weeks while standing up the service rather than months. Using Agile techniques, a series of sprints will ensure that you start to use the system and generate savings as soon as possible. With our technical and business experience and our post live support, we ensure that you are up and running on your terms.

Low risk:

Our proven experience allows us to manage cloud transformation, hybrid estates and integration within the cloud with low risk. We understand security and can take you through the implications using appropriately skilled resources. With one of the longest track records in the industry of implementing standardized best practice processes, you can be sure that Atos can manage any change associated with the transition.

Low cost:

User based pricing with no or limited upfront costs based on a set of services that are sized to comply with the ERP functionality that you require. This charging model allows you to start small and provision additional users as and when required.

“We are convinced that 2014 to 2018 will be a vital period for business to embark purposefully on Digital Transformation, to increase, secure and consolidate growth. Those that miss this boat, by ignoring it, observing from the side-lines or merely paying lip service to the trends of change, will find themselves in a very difficult position by 2020.”

Atos Ascent Thought Leadership, Journey 2018

An agile approach to cloud deployment

Our Atos Agile deployment methodology guides you through the three stages of cloud deployment:

Prepare

You need to understand the impact on your organization of new collaborative ways of working including improved processes, business intelligence and mobile. Atos will build on your free of charge pre deployment business case to ensure that you have all the elements in place to transition and gain the maximum advantage from the Oracle ERP Cloud without impacting your day to day operations.

Provision

With a simple subscription model and prebuilt business processes we will quickly provision your system. Once the design is fixed we then introduce prebuilt data loaders to enable existing data to be loaded to the new system while integrating with existing core services.

Support

A range of value-enhancing services are offered by Atos either as a transition into live or alternatively as a long term arrangement. These include:

- ▶ 24x7 extended support desk
- ▶ Change management to help you maximize your returns from the new ways of working
- ▶ Data extract, translate and load services to get you up and running
- ▶ Integration design and deployment

Why Atos

As the #1 in Europe for cloud operations and with our own public cloud company in Canopy we make any transition to the Oracle ERP Cloud easy. Whether this is transitioning all your systems to the cloud or moving to a hybrid model we can use our experience to guide you through the process. We will ensure effective integration with legacy and third party applications through Oracles External Data Integration Services for Oracle Cloud using product and application specific templates and processes. As a single partner we offer knowledge of processes, understanding of legacy integration, awareness of legal issues and experience in identity, security and risk management. As an all-inclusive service provider for Oracle, Atos has the expertise and accreditation across a complete spectrum of relevant areas and technologies. We can give you confidence to embrace cloud and not be side-lined.
