DECARBONIZING ATOS

ANNOUNCING TODAY COMMITMENT TO NET-ZERO BY 2035

Atos carbon emissions

DECARBONIZATION: FROM ATOS TO OUR CUSTOMERS

77%

of our customers have **already** set emission reduction targets

| 85% of GtCO₂e emissions are produced by Manufacturing and Resources & Services Atos' customers

\$29bn

**Green IT Market value
by 2024**
vs \$8.7bn in 2019

| Market potential with 25%+ CAGR
| Carbon footprint management lead the pool
| IOT, Cloud Computing, AI & Analytics, Digital Twin

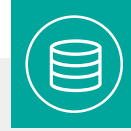

LEADING A GLOBAL DECARBONIZATION STRATEGY

DECARBONIZATION ASSESSMENT

Categories

- Data
- Services Staff
- Software
- Hardware
- Data Center / Infra / Network
- Company
- Supply Chain
- Usage

DECARBONIZE CORE IT

Reducing the IT carbon footprint

- Codex for AI & Hybrid Cloud optimization
- Sequana "Just-sizing", DLC for PUE ~1.0, Edge, Quantum
- Sustainable manufacturing & decarbonation
- Decarbonized Workplace
- Application transformation
- Green IT Horizontal Portfolio

DECARBONIZE BUSINESS PROCESSES

Reducing all business emissions per industry

- Resource & Services
- Telecom, Media & Technology
- Manufacturing
- Public Sector & Defense
- Healthcare & Life Science
- Financial Services & Insurance

CORE IT DECARBONIZATION COMMITMENT

OUR LARGE CONTRACTS EMBARK A CO₂ REDUCTION COMMITMENT:
DLA (DECARBONIZATION LEVEL AGREEMENT)

MEASURABLE

From 15% to 25% over standard DWP - Cloud contracts

BINDING

Atos will offset the CO₂ not reduced aligned to the contract

AUDITABLE

External 3rd party audit every contract year

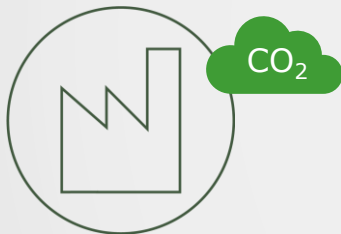

DECARBONIZE BUSINESS PROCESSES

CUSTOMER	INDUSTRY	DECARBONIZATION BENEFITS	OFFERING
 Renewing Our Future		Renewable energy generation optimization	Predictive maintenance for wind energy (Codex)
Global leader in container shipping		Fuel consumption reduction	Fleet resources optimization (Codex, Mindsphere, IoT)
European Large Insurance Company		Fuel consumption reduction	Behavior-based automotive insurance (Codex, IoT)
		Resources and energy efficiency Manufacturing process optimization	Digital Factory (Industry 4.0.) (Digital Twins, IoT, Edge Computing, Codex)
		Energy consumption & GHG emission reduction Renewable energy increase	Integrated digital platforms (Smart Cities and Infrastructure)
 		Increase in energy efficiency Reduction in energy consumption	High Performance Computing (BullSequana)

PIONEERING DECARBONIZED ECONOMY

Quantum technology for CO₂ capture

ACCELERATE THE DEVELOPMENT OF THE CO₂ CAPTURE TECHNOLOGIES FOR MAJOR ENERGY OPERATOR

Co₂ Capture Technology
using adsorbtion propriety
of materials to trap the
CO₂ emitted

ATOS VALUE CONTRIBUTION

AtoS

QLM Simulation
of complex chemical
reactions

Goal: Achieve carbon neutrality in 2050

ATOS DIFFERENTIATORS

| LEADER IN DECARBONIZATION
