## Turning visionary workplace strategy into reality with Atos and Citrix

**Mobility is changing fast and Smartphones and Tablets are the norm for daily business. Wearables, glasses and the Internet of Things are rapidly increasing in popularity. To keep up with the speed and complexity of mobile technologies the integration and management of mobile endpoints is key to today's IT strategy. Atos mobility offerings empowered by Citrix remove complexity, give back control and focus on mobility as the game changer for your workforce.**

**Utilizing the benefit of mobility in a secure way has never been so easy and complete. Atos provides businesses with a comprehensive set of services to integrate mobile endpoints into their IT environment – quickly, reliably and securely. Atos helps our customers empower their mobile workforce capabilities, and stay up-to-date with the non-stop release of technology updates in the mobile world.**

### Atos mobility Offerings

Eliminate the requirement to have more than one device to do daily business, protect resources and minimize electric power consumption. We provide a diverse innovative, cost efficient and business improving service that supports your business.

**Atos Enterprise Mobility Management:** Based on Citrix XenMobile technology, we provide the fundamental platform for business application mobilization; offering innovative mobile end-point integration and end-to-end lifecycle management.

**Atos Virtual Workplace:** A suite of services using Citrix XenApp and XenDesktop, delivers desktop and applications to any device from a secure and compliant infrastructure.

**Atos Enterprise File Sync & Share:** Using Citrix ShareFile we offer enterprise-ready file synchronization and sharing, keeping full security and control for companies IT while giving employees access to their data anywhere, with any device at any time.

### It's all about service

Meeting business needs and user demands. Your company offers a unique and valuable service to your customers. It's likely you have a range of tried-and-tested processes and best practices that help you to do this. They're what make you who you are as a business. They work, and you need your mobile working approach to enable them, not hinder them.

The components of our mobility offerings are designed to meet the requirements specific to your business and employees. Whether you need to put the latest tablet in the hands of your sales team, enable your managers to share sensitive files while travelling, or roll out the latest corporate applications to all employees in record time, we will work with you to make it happen.

Atos mobility services offers innovative mobility solutions while keeping security, compliance, quality and cost at front of mind.

### Atos mobility

- ✓ **Improved productivity – right information at the right time**
- ✓ **Streamlined processes – react faster wherever you are**
- ✓ **Lower IT and communication costs via transparency and control**
- ✓ **Secured mobile data and endpoints**

### Sustainability

Mobile devices are not only quicker to boot up before use, they also have significantly reduced power consumption in comparison to standard computers. Enterprise Mobility services from Atos accommodate BYO scenarios. Enabling private usage and isolated, secure company data on one device.

# Delivering the benefits your business deserves!

## Look around

The last few years have seen a transformation in how and where we work. Collaborative tools like file sharing and social media have become the norm, and employees want to be able to take their work with them wherever they go, even those with traditionally desk-based roles. And the mobile revolution shows no signs of slowing, as technological innovation becomes part of the daily routine.

IT needs to keep up with these changes whilst maintaining security, compliance, service quality and cost management. Consider how these new but permanent situations could challenge traditional management models:

▶ Every employee is now a knowledge worker. From the factory floor to the board room, workers need information at their fingertips to do their jobs

▶ Users' expectations have changed with the consumerization of IT and the rise of bring your own (BYO). Employees want a choice of devices, and they want a compelling user experience

▶ Users want to use their device for both work and personal applications. The line between these two areas is increasingly blurred

▶ There is huge diversity in types of devices, data and applications across the organization. Each must have appropriate support

▶ Clients and employees are ready for cloud services, and want access from anywhere

▶ Social has become the default, even in the workplace. Networking platforms fuel greater collaboration and productivity

▶ Business is done much faster thanks to advances in technology and connectivity. Employees and clients expect real-time responses

▶ The trend for business adoption of new technology has started with solutions such as wearable tech plugged into health insurance

▶ The need for security for mobile data and application grows due to the fact of increasing mobile crime.

## Why Atos?

We have more than one thousand mobility specialists worldwide with expertise throughout the entire mobile IT service chain; from consulting, design, and build, through to operation, maintenance and a visionary strategy for future digital workplace scenarios. We've delivered Enterprise Mobility solutions since 2002 and can draw on expertise out of a huge number of implementations, including large scale, world-wide projects.

We provide continuous service updates in line with changing market needs, combining hardware, software and services in one great mobile offering. Our Atos' Global Competence Centers are ready to implement customer specific solutions.

We work closely with our global strategic alliance partner Citrix to leverage an extensive technology portfolio, ensuring the delivery of world-class solutions that deliver real and tangible business benefits tailored to our clients markets and sectors.

## Why Citrix?

Citrix leads the industry in mobile workspace solutions, measuring the value of technology by how it benefits people. It's about what they need to do and what they need to achieve. This vision inspires Citrix to build mobile workspace solutions that give people new ways to work better with seamless and secure access to the apps, files and services they need on any device, wherever they go. Citrix Workspace Suite is the most complete, integrated mobility solution for helping people and business become more productive with an on-demand mobile workspace. Citrix enables workers with access to all of their applications, data and personalized desktops, optimized to meet the security, performance, personalization and mobility requirements of each individual.

## Together

We don't practice a one-size-fits-all approach. We work closely with each customer to identify the mobility challenges and priorities that are most important to them. Then we help solve them in a way that works for everyone in the business.

## More benefits
