The healthcare world is changing

Providers need innovative approaches to address the growing cost pressures, the rise of consumerism and the need for interoperability. Atos suite of products enables outcomes improvement and operational efficiencies while addressing these provider needs.
As care becomes more patient-centric, the need to share data across the care continuum increases and analytics play an increasingly important role. Both patients and providers need easy and efficient access to complete patient data from disparate sources, including legacy data. This is critical for providers to enable analytics, improve workflows, reduce costs and also improve patient satisfaction. Atos suite of products enable providers to meet these needs and also achieve regulatory compliance.

Atos Edge

Atos suite of healthcare-specific products are designed to enable providers meet the challenges of patient engagement, data management and RCM analytics. This suite of HIPAA-compliant products include Patient PULSE, Engage, Patient Information Exchange (PIE), Legacy Archive Solution (LAS) and RCMAnalytics Genie.
Data Management Solutions

Our data management solutions enable providers to resolve their data interoperability needs.

Legacy Archive Solution

Legacy Archive Solution (LAS) is a healthcare focused, HIPAA compliant archiving solution that an organization can use to store their legacy clinical, financial and other administrative data in one single view. LAS provides a short implementation cycle, a centralized data repository and an intuitive front-end that makes training easy and accessing your legacy data simple.

LAS empowers healthcare organizations to:

- **Reduce Costs**: Retire legacy systems to reduce maintenance and personnel costs up to 80%
- **Data Aggregation**: Consolidate data from multiple disparate applications to provide easy access to the patient’s record
- **Analytics**: Enable access to historical patient data for analytics to improve care outcomes and operational efficiencies
- **Compliance**: Meet regulatory mandates for data retention and reduce compliance risk
- **Efficiency**: Significant improvement of physician and nursing work flow for retrieving pertinent patient information

Patient Information Exchange

Patient Information Exchange (PIE) empowers health care providers to transform patient care by providing physicians with single point access to patient’s clinical and financial data from multiple sources. It aggregates and shares patient data across the care continuum, enabling providers to achieve better care coordination and interoperability.

- Reduces time-to-care and improves quality of care by providing single point access to information
- Enables improvement in outcomes with delivery of real-time information from disparate clinical systems and care settings to streamline interfaces with multiple data sources and provides reports, graphs and trends for patient data across the continuum
- Enables performance efficiencies by streamlining physician workflow and consolidating patient information
- Enables interoperability by helping providers share information across the entire care continuum
Our comprehensive solutions provide a 360 degree approach to educate, engage and empower the patient population.

**Patient PULSE**

With the rise of consumerism in healthcare, patients are expecting greater access to their information, convenience of self-service options and customized health information. Patient PULSE is a multi-channel, dynamic patient engagement framework that applies a 360-degree approach to engage the patient and increase patient satisfaction across all touch points.

- Customizable EHR-agnostic integrated patient portal
- Secure vehicle for patients to access health records real-time and interact with their healthcare provider anywhere, anytime
- Seamless integration with all backend systems to produce a single view of the patient’s information online
- HIPAA compliant and MU-certified
- Personalized patient education
- Operational, clinical and user analytics

**Engage**

Engage is an on-the-go patient engagement application and a point of service interactive experience for patients, health plan members, and caregivers. It is a suite of interactive live apps designed to provide a rich, fun and meaningful experience to the patient.

- Online transactions, digital hospital forms and other functions can reduce staff resource time by an estimated 35 percent as users complete routine tasks online
- Potentially reduces no-show rates by approximately 15 to 20 percent
- Decreases ER visits and re-admissions by educating and engaging patients on a regular basis
- Builds brand awareness and loyalty by providing a customized, personally branded mobile application
- Empowers collaboration among patient, provider and payer
- Provides an efficient, ONC-HIT certified tool to fulfill Meaningful Use requirements
**Revenue Cycle Analytics Solutions**

*Improve clinical documentation, increase coding accuracy and optimize revenue.*

RCM Analytics Genie is a suite of applications that enable integrated revenue cycle. Our vendor neutral and cutting edge web-based solution is customizable based on the client’s requirements and provides easy access and monitoring. RCM Analytics Genie has three modules - Revenue Cycle Optimization, Clinical Documentation Improvement and Coding Compliance Insight.

**Revenue Cycle Optimization**

Revenue Cycle Optimization (RCO) analytical tool consolidates financial and patient data from various financial systems to provide visibility and insights into the organization’s account receivables.

- Executive dash boards to identify revenue bottlenecks and accelerate cash flow across the enterprise
- Guide business strategy by identifying service line profitability and streamline monthly reserves
- Reduce bad debt and understand the root cause
- Industry focused KPIs for Hospitals & Physician Practices
- Alerts and notifications for focused revenue realization
- Benchmark analysis for industry focused growth

**Clinical Documentation Improvement**

It is a physician documentation feedback solution designed to educate and help providers through the coding process.

- Provide assessment, education, audit services, and complete outsourcing of successful Clinical Documentation Improvement (CDI) Programs
- Identify opportunities to increase documentation specificity resulting in improved accuracy of severity of illness and risk of mortality
- Ensure quality outcomes and revenue integrity through coordination, collaboration and communication with providers and coding staff
- Focused on delivering a CDI application that facilitates process workflows for CDI and coding team performance

**Coding Compliance Insight**

Coding Compliance Insight (CCI) is a valuable tool to measure coding accuracy and provide information on the financial impact of any errors noted.

- Timely feedback to coders and clients on coding
- Customized reporting to enhance coder education
- Real time synchronization with all coding systems
- Electronic tool accessible anywhere and anytime
- Interface tool designed for ease of use
Customer Testimonials

We serve hundreds of healthcare organizations. Here is what some of our customers are saying about us.

“I have only positive feedback on the Anthelio Legacy Archive Solution team. Everything has gone very well. Implementation team members have been outstanding. It has been a pleasure.”
Supervisor, Patient Financial Services
McLaren Greater Lansing

“The implementation of the PIE and Sunquest applications here at St Mary’s Hospital went smoothly. The job was well carried out and support provided by Anthelio was excellent.”
Chief Medical Information Officer and Hospitalist
St Mary’s Hospital

“Anthelio’s innovation, creativity, and breadth of healthcare knowledge has impressed us, and we are confident Patient PULSE will help us take our patient engagement initiatives to the next level.”
Chief Information Officer
IntegraMed Fertility

“Our administrative team is very impressed with the functionality of the app and how easy it is to use. This will be extremely helpful to our patients as they access their specific information from anywhere/ everywhere.”
Vice President IS Division/CIO
Sarah Bush Lincoln Health Center
