Revenue Cycle Optimization
Revenue Cycle Analytics

Atos offers a comprehensive suite of analytical applications including an interoperability platform, patient engagement framework, and clinical portal solution to benefit the delivery of patient care. Revenue Cycle Optimization analytical tool is a part of the RCMAnalytics Genie, a suite of applications that enables integrated revenue cycle management. The other two modules are: Coding Compliance Insight and Clinical Documentation Improvement

Optimize Revenues

Revenue Cycle Optimization (RCO) analytical tool consolidates financial and patient data from various financial systems to provide visibility and insights into the organization's account receivables. The web-based application combines dashboards, standard reports and ad hoc reporting capabilities into a powerful analytics solution, making it easier for organizations to monitor and manage their accounts receivables.

Organizations will save countless hours spent compiling, cleansing and mastering data, building and supporting interfaces and producing and distributing reports. Analytics empowers healthcare providers to reduce revenue leakage, increase staff productivity, maximize net revenue and accelerate cash flow.

Trusted partner for your **Digital Journey**

Analytics for integrated revenue cycle

Key features

RCO provides healthcare providers, both hospitals and physician practices, with access to a comprehensive list of key performance indicators (KPIs). Some of the hospitals KPIs are net days in A/R, bad debt, cost to collect, case mix index and DNFB. Some of the physician practice KPIs are aged A/R as a percentage of outstanding A/R, primary physician practice operating margin, net income/loss per primary FTE physician, practice cash collection percentage and POS collection rate.

Other key features are:

- Executive dashboards
- Operational reports for daily operations focus
- Web-based solution for easy access and monitoring
- Role based security
- Configurable as per client requirement
- Use based preference selections
- Industry focused KPI's for hospitals and physician practices

- Vendor neutral solution
- Alerts and notifications for focused revenue realization
- Benchmark analysis for industry focused growth

Key advantages

RCO provides the analytics you need to identify revenue bottlenecks and manage reimbursement trends so you can focus your resources on what matters most - providing quality patient care.

- Accelerate cash flow across the enterprise
- Identify revenue bottlenecks
- Reduce bad debt and understand its root causes
- Enhance productivity with workflow tools

- Guide business strategy by identifying service line profitability
- Streamline monthly reserves
