

Experience the digital workplace

with Windows 10 and Atos Workplace services

On July 29th Microsoft launches Windows 10. With free upgrades available for consumers most of your employees will soon be using Windows 10 at home.

With Windows 10 you can enter a new era of workplace services. It will bring a wave of new features and choices for businesses. What role can Windows 10 play in your workplace transformation strategy?

Atos is ready to get you up and running on Windows 10. Ask us for a workshop to get your organization started.

Improve productivity with Windows 10

There is a minimum learning curve required with Windows, with an intuitive and familiar user experience that adapts to your device, whether it is a phone, tablet, laptop or PC. Finding information, contacts or applications has never been easier for users.

What about my Applications?

Your current applications should continue to run on Windows 10, ensuring a smooth transition and business continuity. Atos can be on hand to help with any problems along the way.

The new Universal Apps format, where an app will run on any Windows device from phone or tablet to desktop, unlocks exciting potential for application developers in future. Is it part of your roadmap yet?

An App Store for your business, simplifies the user experience, making it easy for users to get the apps they need, securely and with you always in control.

Atos will help with compatibility and delivery options, making sure all your applications run on Windows 10.

Make security your priority

Your workplace is becoming mobile by default and users love the flexibility. At the same time cybercrime is more sophisticated than ever.

Your business technologists. Powering progress

It provides continuous protection and faster updates without needing constant connection to the corporate network. Allowing you to secure your device, data and applications better than ever.

Whether it is a Corporate or Bring Your Own Device Atos can help you understand how to improve levels of trust and compliance with the choices available through Windows 10.

A future of continuous feature releases

Windows 10 brings a departure from traditional refresh cycles, to a continuous release of new features for users. With Atos' guidance you remain in control of when and how Windows 10 will be updated.

Windows 10 gives you the chance to look at user requirements and refresh devices based on the benefits it can bring, for example replacing notebooks with touch devices as applications become touch enabled. Ensure you are never stuck on an aging platform, such as Windows XP, ever again.

Work anywhere with Windows 10

Digital transformation is delivering flexibility and choice for your workforce. For many an internet connection is all that is required to work. Cloud services, such as Office 365 are becoming the norm. Together with Windows 10 a hybrid of legacy and cloud services can be delivered seamlessly, offering a great user experience.

Workplace transformation in a digital era

Atos believes Windows 10 empowers your digital journey, and helps you to address 4 key transformation challenges:

- ▶ Deliver a familiar customer experience that has been designed to delight your users and keep your business productive.
- ▶ Simplification allows for a continuous support

experience that provides the scale for operational excellence.

- ▶ Enabling connected workstyles that support the transformative journey to business reinvention
- ▶ Trust and Compliance to confidently know your digital assets are protected, secure and recoverable.

Ready to find out more?

Atos is already exploring the possibilities of Windows 10 with some of its clients, isn't it time you make plans?

Our Workplace services are ready to help you understand how Windows 10 fits into your workplace transformation journey today.

Find out more with a 'Move to 10 Workshop' as a starter for Windows 10. From there Atos can help assess, design, implement and manage Windows 10 in your future workplace.

Your workforce will be using Windows 10 at home from July 29th. How long will they have to wait before benefitting from it at work?
