

Healthcare in the Digital Age

Solutions you can trust

What is digital healthcare? It is integrated data. It is patient insight. It is the foundation of comprehensive care. Digital healthcare is about getting the right information to the right person at the right time to make the right decision for patient care. Getting digital healthcare right is much more than managing ones and zeros. Digital healthcare is about integrating people, process and technology into an orchestrated solution that delivers the best outcomes at the best cost. To get digital healthcare right, you need to be experts at data and at healthcare. Atos is that expert.

Trusted partner for your **Digital Journey**

Atos

Driven by the desire to better serve the patient at the end of every keyboard, \$13B global IT Services giant Atos entered the US healthcare market in 2015. While you may have heard our name associated with the Olympics or Disney, the Atos healthcare roots are grounded in the companies that formed our fast-growing division. Our digital health solutions are the technology foundation for more than 120 unique US healthcare organizations and more than 60 million patients today.

Technology Transformation.

The key to better patient insight is the ability to manage and leverage the data across your organization. Today's digital healthcare needs demand that you transform your technology landscape with the highest performance technology and communications platforms. Outsource your data center, desktops and communication systems to Atos and modernize your operations while freeing valuable resources to work on more patient-care strategic projects. Benefit from our sophisticated EDGE transformation approach to Engineer, Design, Gather and Enhance your systems while running them in secure public, private and hybrid Cloud environments. The result? Peace of mind that comes from trusting that your digital workplace delivers the transparency, compliance and insights your organization needs to grow with the healthcare changes yet to come.

Cyber Security.

Data cruncher [Experian has predicted^{\[1\]}](#) that in 2017, healthcare organizations will be the most targeted sector for new sophisticated data attacks. Are you ready? Atos is. An Olympic partner since 2002, Atos protected the 2016 Olympic and Paralympic Games from more than 250 million security events. We use the same technology to protect your organization. Our Security as a Service solutions protect your healthcare data 24/7.

Integrated solutions include: network and endpoint protection; identity governance; and data and IoT security. All orchestrated by an intelligent control center that analyzes and stops threats before they can cause damage. The result? You sleep better knowing that your data and your ability to care for patients are protected.

Business Optimization.

While you focus on your patient's needs, we optimize your business. From end-to-end revenue cycle management to HIM outsourcing, we optimize your revenue so you can focus on adopting new models like value-based care. It starts with Patient Access services that help you schedule patients, verify and pre-collect insurance and even credential physicians. Our Charge Accuracy solutions include transcription, medical coding and clinical documentation improvement (CDI) solutions to help ensure accurate, complete and compliant clinical documentation. Our Patient Financial Services round out the solution to identify and collect the payments you've earned while maintaining strong patient relationships. The result? Optimized business processes that improve quality outcomes and reporting while protecting your bottom line.

Population Health Management and Precision Medicine.

The key to long-term care management lies within us...literally. From sequencing the genomes for disease insights to using that information to drive daily care, Atos is catalyzing precision medicine as the answer for individual care management. At the same time, we enable patient, provider and payer interactions with online and mobile solutions to aid your population health strategies. The result? Innovative and proven solutions that will improve long-term outcomes, costs and population wellness.

Clinical Transformation.

As a healthcare organization, you collect a lot of information on and about your patients. How are you using that data? Our EHR implementation and optimization services help ensure that you can leverage EHR data to drive proactive and timely care interventions, eliminate delays and lower delivery costs. At the same time, we can map the data you collect across your organization into unique patient journeys that pinpoint improvements needed in key operational and clinical areas. The result? The best, most efficient patient experience every time.

Put your focus back on the patient.

At the end of every keyboard is a patient. At Atos, we remember that every day because our technology touches more than 60 million patients every day. Our digital healthcare journey has just begun. To find out how you can leverage digital information to get the right information to the right person at the right time to make the right decision for patient care, contact Atos.
