

Hoox for business as a service

Ultra-secure smartphone to protect
your communication and data

Trusted partner for your Digital Journey

Atos

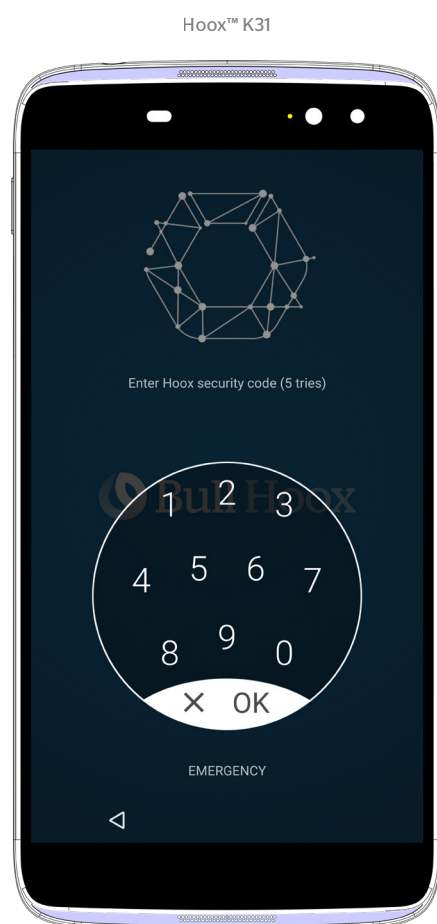

Hoox, your secure smartphone for mobile productivity

With Hoox, benefit from secure professional smartphone offer:

- Turnkey solution
- Cost-efficient monthly subscription
- In accordance to your security policy

With Hoox, exchange your sensitive data in complete safety with your staff: VIP, finance, R&D (patents), sales, mergers acquisitions, HR, field staff, crisis management...

This solution is perfect for collaborators on the move, specifically abroad or in high risk areas.

Smartphone with in-depth security

Hoox is the first natively secure professional smartphone.

Secure device: Hoox systematically ensures the confidentiality and integrity of stored data, applications and the operating system. The access to the terminal is controlled, and communication ports are strictly managed to prevent attacks.

Secure communications: Your phone conversations, instant messages, emails and all other exchanged data are encrypted, which ensures confidential communication.

Secure applications: Access to mainstream and professional applications through our Hoox Secure Store. Be sure of the integrity of these apps and the security of their data.

Mobile productivity

Based on Android, Hoox is easy to use and perfectly suited to mobile professionals. Its intuitive interface makes using it easy and efficient. The collaborative features, such as conference room or group instant messages, allow the collaborators to stay connected and share data while preserving the confidentiality of your sensitive activities.

Simplicity and availability

Hoox brings you peace of mind. Atos delivers your Hoox smartphones fleet within a few days. Atos manages and hosts the central system to maintain the confidentiality of your information.

Connect with your team.
Your conversations and conference calls remain confidential

Share files using secure group instant messaging

Use your applications in complete security

The result is a trusted communications service, end-to-end secure, in compliance with your security policy.

Turnkey solution

Atos manages your Hoox fleet by providing a "pool" of unassigned terminals. The users just have to scan your QR code received by mail to enroll your Hoox smartphone. Users only need to insert their SIM card and the login password to access their messaging service. No need to change your operator subscription.

Easy adoption by users

A crucial tool such as a smartphone needs to be intuitive and suited to the daily life to be accepted by the users. With Hoox, there is no impact on their communication habits, either abroad or at home. The solution provides the full Android experience that they are used to with extra value of secured communications.

Smartphone features

- Smartphone based on Android 6.0
