Atos and Red Hat: Enabling Digital Transformation with Atos Managed OpenShift

Atos Managed OpenShift (AMOS) can help you evolve your legacy infrastructure and create new digital services that meet your customers’ demands, now and in the future.

**Benefits of AMOS**

- **66% faster development cycles**
- **$1.29 million efficiencies**
- **100% portability**

**In collaboration for over 10 years**

**Strong, winning partnership**

Atos has 2,000+ skills and 200+ accreditations across Atos.

**Atos is a Red Hat expert partner**

Digital transformation is important for all businesses. Those that don’t make the transition will get left behind. Enterprises need to develop new digital services, evolve existing services and more while adopting Agile and DevOps practices.

Enterprises need the technology and people with aspirations to enable a frictionless movement of applications across clouds: build once, run everywhere. Overcome the constraints and inflexibility of legacy applications by removing the obstacles of legacy applications and platforms and enjoy efficiencies of 35% less IT staff time per application.

Fuel innovation and exceed customer expectations by adapting digital services whenever needed. Benefit from an average of $1.29 million in annual savings per 100 developers.

Create the right culture to rapidly launch new services to customers. Enterprises can respond 3x faster to business demands, with developer productivity increasing by 300%.

Deliver services to market faster with 66% faster development cycles.

**Triggers and challenges**

Need to compete with digitally driven businesses that release new services at speed.

Allow developers to innovate using the best tools and technologies to meet customers’ needs.

Legacy cultures and policies are slow while customers want to be more agile and adopt DevOps ways of working.

Overcome the constraints and inflexibility of legacy applications.

Fricitionless movement of applications across clouds: build once, run everywhere.

Legacy cultures and policies are slow while customers want to be more agile and adopt DevOps ways of working.

Legacy culture
