

### Atos presents "DORA", the revolutionary digital platform for energy retailers

**Vienna, European Utility Week 2018, 7 November 2018** - Atos, a global leader in digital transformation, presents DORA, its new digital energy platform. This application suite "Digital Operations for Retailer by Atos" has been designed to enable energy retailers operating on the deregulated market for electricity and natural gas to better achieve their digital transformation, delivering their own offers in an agile and safe way.

*"The utilities sector is becoming more competitive every day and we need to ensure that the proposed digital tools are able to generate a real advantage for our customers. With DORA we also offer small and medium-sized utilities a perfect and complete suite of digital transformation designed to maximize the effectiveness of electricity and gas sales processes",* said **Giuseppe Di Franco, CEO of Central Eastern Europe & Italy.**

Created thanks to Atos' experience of over twenty years in the energy sector, as a partner of the main European utility companies, the new Atos application platform, in line with the country regulations, achieves the highest degree process integration from customer to back-end, minimizing the need for additional activities. DORA includes over 200 processes and 1000+ activities, roles and functionalities typical of an Energy Retailer, as well as an automatic construction tool that allows them to enrich their own product catalog. It also makes available a specific and proprietary methodology that follows the company, from the offer phase to maintenance, in a simple and transparent way, thus significantly reducing TCO. All this translates into a reduction of up to 50% of time-to-market, while allowing agility and desired levels of customization.

To support the Energy Retailer's strategic needs and accompany it in the best possible way in its digital transformation, DORA exploits the power of SAP S/4HANA. In the process designed with the DORA Methodology, Atos also supports its customer in the architectural choice by defining and designing the hardware platforms that better optimize and enhance the functioning of the DORA Digital Platform in HANA, providing the On-Premise solution on Bullion and BullSequana servers of which Atos manufacturers, in Private Cloud or in Public Cloud.

**Atos at European Utility Week**

Atos will be present at the European Utility Week which will take place in Vienna on 6-8 November and will share its vision and experience in digital transformation for utilities at booth # A.B20.

###
