

# Workplace Mobility

For nuclear plant maintenance

## Challenge: The scheduled refueling outage

Hundreds of **short-term contractors** converging on a plant for **refueling every 18-24 months**

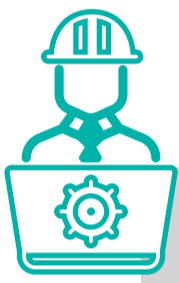

**Meticulous regulatory and data management procedures** for a long, detailed paper trail

**The alternative to paper:** provisioning and managing hundreds of secure mobile devices for each outage

## Solution: Automated device provisioning and lifecycle management

Atos Workplace Mobility provides:

**Devices**

**Automation and standardization**

**Consistent and secure user-focused experience**

### Workplace Mobility devices are:

Secure

Preconfigured for workers' jobs

Updated automatically

Refreshed at your desired intervals

Enablers of more effective and efficient refueling

Connected to your device ecosystem for real-time insights into productivity

## Outcomes: Workplace Mobility from Atos provides devices ready-to-go when you need them

Shorten time offline		Improve accuracy over paper method	
Boost efficiency & productivity		Reduce paper	
Reduce costs of scheduled outages		Minimize manual data entry	
Move devices from CapEx to OpEx		Create an e-audit trail
