

Population Health and Value-Based Care Workshop

We are at an opportune moment in time to take advantage of the abundance of data available through historical and significant investments in EHR and other business technologies to create cohesive strategies that will enable organizations to truly improve quality, reduce costs, and take on a consumer-centric perspective that promotes value-based care.

Atos understands the evolving world of healthcare aligned with new digital capabilities, combined with market forces of exploding costs and ever-present budget. The company creates an opportunity to realize benefits such as 24x7 personalized care, outcome-led models of care, high-performing operational models, and improved risk and compliance management. As a valued Atos customer, Atos is offering a complimentary workshop intended to promote organizational understanding of and strategic plan for addressing the challenges of population health and value-based care.

Why Invest the Time and Effort?

Workshops offer organizational leaders the opportunity to come together to learn from our experts as well as share thoughts that could lead to improved organizational alignment.

Opportunities such as the following will be discussed:

- Understand comprehensive organizational efforts focused on improved quality, reduced cost, and engaged patients and providers
- Identify opportunities to leverage digital approaches to:
 - [Optimize the use of the Electronic Health Record \(EHR\) and supporting care management technologies.](#)
 - [Leverage population health technologies to improve care collaboration and manage population health of the community you serve.](#)
 - [Define consumer-centric approaches to promote access to care and patient engagement.](#)
- Understand opportunities within your organization to improve quality and reduce cost of care

Approach

Pre-Workshop

- Your organization's executive sponsor will work with the Atos executive account leader to provide a baseline of current organizational priorities and efforts related to population health, ACOs, and other value-based care initiatives. Together we will identify organizational leaders who will be invited to the workshop as well as craft an introductory message.
- Atos will conduct a high-level analysis of current Quality Measure performance and cost management (where applicable) and share initial improvement recommendations and potential opportunities during the workshop.
- Atos is willing to conduct a pre-workshop assessment of two to three practices/clinical sites, in order to share initial findings and recommendations during the workshop

Post-Workshop

- Atos will provide a summary of the workshop discussion as well as key recommendations based on Atos' experience.

Workshop

- The workshop will take approximately 2 hours and will be lead by the Atos Value-Based Care Solutions team.
- The workshop agenda will be customized to your organization, and will also address the following:
 - [Review Atos' Value-Based Care Maturity Model to determine current state of organizational readiness and alignment related to data aggregation and analytics, organizational governance and culture, patient and provider engagement strategies, and care model approaches.](#)
 - [Understand current challenges related to population health and value-based care.](#)
 - [Prioritize organizational needs and alignment with organizational strategic plan and goals.](#)

Recommended Participants

Because of the strategic nature of the workshop, Atos recommends that organizational decision makers and leaders be involved. Roles such as the CIO, CEO, COO, CMO, CFO, informatics officer and data analytics leader, quality leader, marketing executive, ACO leader, digital engagement leader, and HR leader.
