
Charter of Trust: Shaping the future of security

Charter
of Trust

For a secure digital world

“Atos is fully engaged in the digitalization of all areas of the economy. Cybersecurity is a crucial component and enabler for this transition.

Working hand in hand with Siemens we have jointly developed digital solutions such as best-in-class security operating center and identity and access management for extended enterprise and IoT, or prescriptive security analytics based on artificial intelligence.

I fully endorse the initiative of the global Charter of Trust for greater cybersecurity and its ten key principles. I am glad to join as a signatory of this Charter, a great foundation upon which we can build to spread digitalization and create value for our customers and partners.”

Thierry Breton,
Chairman and CEO, Atos

To make the digital world more secure, Atos and major leading global organizations from private and public sector have joined forces within the Charter of Trust global cybersecurity initiative.

The Charter of Trust represents an unprecedented initiative that establishes three primary goals:

- To protect the data of individuals and businesses
- To prevent harm to people, businesses, and infrastructure
- To establish a reliable basis where confidence in a networked, digital world can take root and grow.

By cofounding the Charter of Trust, Atos promotes the need for cybersecurity awareness and the need to work together to strengthen consumer trust in the digital world.

Atos believes that innovative and collaborative end-to-end cybersecurity is a strong asset and competitive differentiator for an organization.

Charter of Trust - 10 key principles

Principle 1 – Ownership of cyber and IT security

Atos' approach for a cybersecurity organization

- Our Vision

In the, digital world, you need a seamless security strategy - and one which evolves continually in the face of changing digital opportunities and threats. From initial consultancy and analysis, through to implementation and ongoing management, Atos is with you every step of the way.

- Our Holistic approach

Protection of our **IT and OT Infrastructure**

Protection of our **products, solutions and services**

Offer cybersecurity **solutions for our customers**

Ensure proactive cyber and physical **protection of our employees**

Principle 2 – Responsibility throughout the digital supply chain

Atos' answer is to have digital authentication for IT and OT throughout the digital supply chain.

- Atos OT & IoT security

Atos Trustcenter covers the whole bandwidth of Public-Key-Infrastructures (PKI) services. Atos is bringing strong authentication to industrial processes and enforce IAM for both IT and OT with its Evidian products. With it Horus product suite, Atos is provisioning, managing devices securely, and protecting devices and sensors without compromising performance.

- Partnerships within the cybersecurity ecosystem

Atos is the trusted partner in the cloud

- Atos and Google Alliance

Atos has entered into a global agreement with Google Cloud to address the digital transformation needs of enterprise customers. This agreement will see the creation of secure solutions in areas including hybrid Cloud security, data analytics & machine learning and the digital workplace.

Atos brings its own intellectual property in terms of modular identities and access management solutions (Evidian) and military-grade encryption products (Trustway), to enable businesses to maintain sovereignty over their own data enhancing greater security and trust.

- Atos CASB service

With this service leveraging McAfee MVISION Cloud, Atos controls and enforces data privacy and compliance policies across Shadow IT, sanctioned Cloud applications such as Office 365, Box, Salesforce, and ServiceNow, and IaaS platforms such as AWS, Azure and GCP.

Principle 3 – Security by default

Security is embedded in every Atos' offers, and thought at every step of the way, both internally and externally.

Atos' division Big Data & Cybersecurity designs a complete range of end-to-end cyber protection solutions.

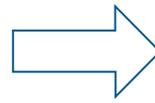

These products and services dedicated to help our customers reach their security and privacy objectives also fuel our own internal cybersecurity protection.

Principle 4 – User-centricity

Atos' approach is to consider the end-user as the ultimate "cyber-border" with its IAM products Evidian and IOT security solutions Horus.

A strong Identity Security Policy through all users, devices, cloud and on-premise applications is the key to an optimized security system and a perfect compliance with regulations.

Protection of the **end-user**

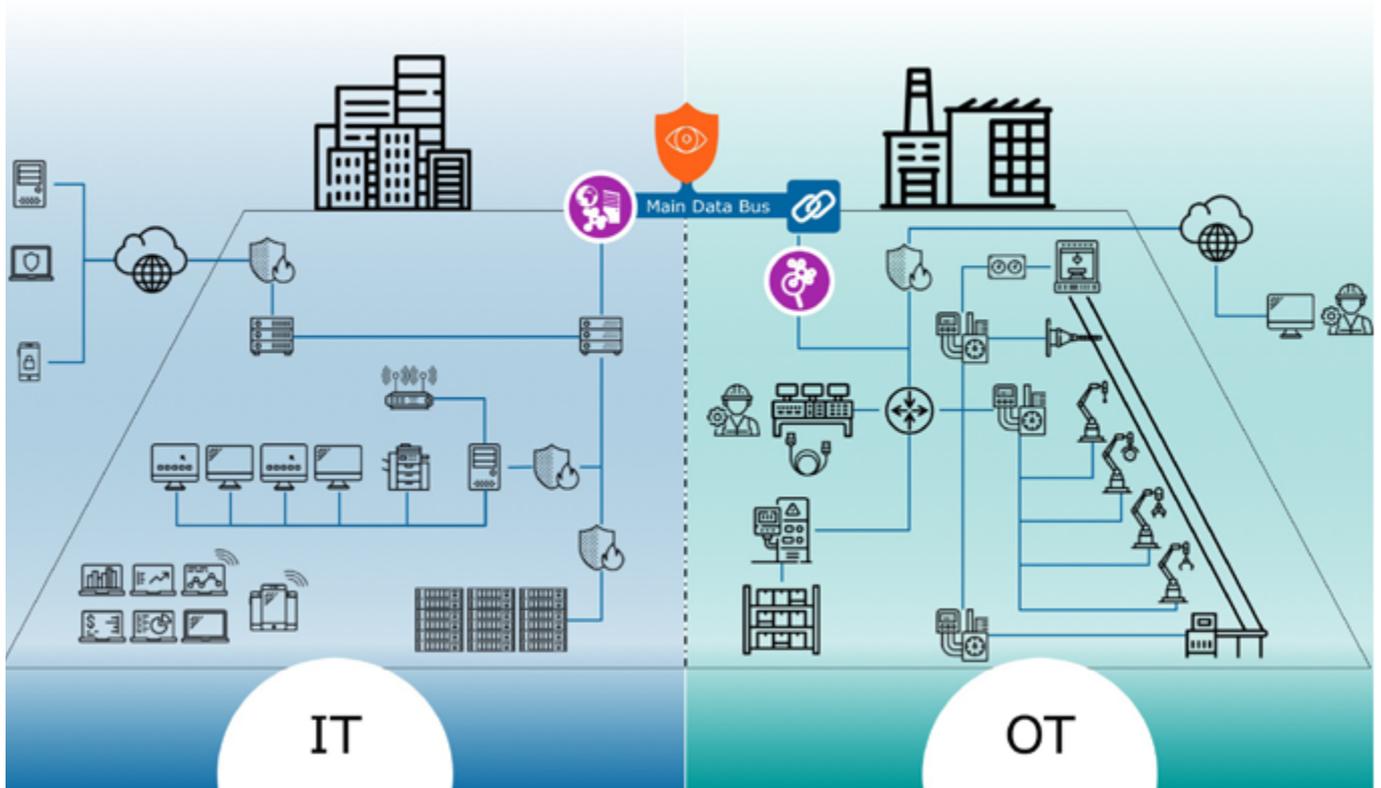

Protection of the **whole company**

Principle 5 – Innovation and co-creation

Atos-Siemens IT/OT Prescriptive Security Operation Center. Atos' prescriptive Security Operations Center (SOC) with automated response is a state of the art security solution which leverages Big Data analytic tools - making it possible to predict security threats before they even occur. In collaboration with Siemens the coverage is extended to the OT environment.

Principle 6 – Education

Mandatory training in security & compliance

Every Atos employee has to complete courses in:

- Security and Safety awareness
- New Data Protection (including GDPR).

Sponsored degree in cybersecurity

Atos collaborates with Transilvania University in Brasov to launch the first English-based master in cybersecurity.

The Expert Community

A network of over 2,100 Atos thought leaders. Together they raise cybersecurity awareness, get trained and share knowledge through conferences.

Principle 7 – Certification for critical infrastructure and solutions

For both our clients' and Atos' interest, it is paramount that our solutions comply with numerous international standards and certifications. As a European leader of cybersecurity and data protection, Atos guarantees the confidentiality of our clients' sensitive data.

All our products are certified to meet the industry highest standards. These certifications include:

Principle 8 – Transparency and response

Atos is providing fast effective response tool

Atos CISO has implemented a cockpit with KPI dashboard and has shared the best practices and its approach to the other COT members.

Atos has implemented a CERT with national security response teams performing forensics analysis and threat intelligence.

Principle 9 – Regulatory framework

Atos contributes to cybersecurity regulation's evolutions in order to enlarge cyber protection and build trust upon shared standards throughout the digital industry.

The European Cyber Security Organisation

ECISO represents the contractual counterpart to the European Commission for the implementation of the cybersecurity contractual Public-Private Partnership.

ECISO members include large companies, SMEs and Start-ups, research centres, universities, end-users, operators, clusters and associations as well as European Member State's local, regional and national administrations.

Atos is an active member of ECISO and Philippe Vannier, Vice-President Executive Big Data & Security and CTO at Atos, is ECISO 1st elected president.

Principle 10 – Joint initiatives

Airbus and Atos partner to protect key EU institutions from cyber threats

17 main European institutions, services and agencies benefit from cutting-edge cyber technology.

The consortium offers a coordinated and upgraded cyber protection solution for all 17 entities, which include:

- highly automated surveillance,
- warning detection and response,
- training,
- and studies to develop a cybersecurity roadmap.

About Atos

Atos is a global leader in digital transformation with over 110,000 employees in 73 countries and annual revenue of over € 11 billion.

European number one in Cloud, Cybersecurity and High-Performance Computing, the Group provides end-to-end Orchestrated Hybrid Cloud, Big Data, Business Applications and Digital Workplace solutions.

The group is the Worldwide Information Technology Partner for the Olympic & Paralympic Games and operates under the brands Atos, Atos Syntel, and Unify. Atos is a SE (Societas Europaea), listed on the CAC40 Paris stock index.

The purpose of Atos is to help design the future of the information technology space. Its expertise and services support the development of knowledge, education as well as multicultural and pluralistic approaches to research that contribute to scientific and technological excellence. Across the world, the group enables its customers, employees and collaborators, and members of societies at large to live, work and develop sustainably and confidently in the information technology space.
