

Hitachi Vantara Breakout session  
11 09 2019 – 15.30

# Transforming Operations Improvement with Data and IoT

Felipe Padilla Gomez, EMEA IoT CTO

# Transforming Operations Improvement with Data and IoT

**HITACHI**  
Inspire the Next

- ▶ This presentation explores the topic of how Oil & Gas is leveraging existing data, creating more data with the vision of creating more automation as part of Hitachi Digital Oilfield vision.
- ▶ We then explain how a series of Hitachi components align to create and deliver a solution that has applicability to many use cases in the 3 business areas of Oil & Gas – Upstream, Mid-Stream and Downstream
- ▶ Most important we include the value the customer recognizes the solution(s) have with their operations improvement objectives
