

VMware Demo session  
11 09 2019 – 17.30

# VMware, The Superpower Provider

Edwin Baird, Senior Global Solution Architect EUC

- ▶ As wearable devices continue to advance and become democratized in the workplace, we are bound to evolve into a workforce of capabilities resembling the likes of superpowers. While we are still far away from shooting laser beams from our eyes, we know that devices like Google Glass will deliver enhanced capabilities to those in manufacturing, healthcare, and transportation. See how VMware Workspace One UEM, together with Google Glass and other ecosystem partners, can help deliver superpowers to your customers.
- ▶ We will be showcasing this at VMworld in Vegas this year and we would like to bring this experience with us to the Atos Expert event fresh from here to let you see the art of the possible.
