

Hitachi Vantara Demo session  
11 09 2019 – 18.00

# Fleet Management with Pentaho IoT Analytics

Rocio Perez Nunez  
Digital Insight Solution Architect

# Fleet Management with Pentaho IoT Analytics

---

- ▶ IoT systems can improve operations by helping to monitor or manage the status, health and actions of connected things.
- ▶ IoT analytics capture sensor data, integrate and blend it with other data, infer something from that blend, and take action to ultimately improve business performance.
- ▶ This demo will show how Pentaho can integrate with existing operational systems such as maintenance and parts history, analyze historical fleet data to identify trends and anomalies in a Fleet Management use case.
