The very nature of simulation is shifting from a traditional - monolithic scalar based computing - to a purpose-built workflow that may include any type of CPU, GPU, Vector units, TensorFlow units, clustered or shared memory computing, on premise up to the public cloud. It is of utmost importance that your supercomputer solution has all the flexibility to run seamlessly any type of workload, anywhere, now and tomorrow.

The new BullSequana XH2000 is a breakthrough evolution of the market leading BullSequana X1000 supercomputer, the answer to rising hybrid computing requirements.

With BullSequana XH2000, Atos brings to the market a no compromise, highly flexible, Exascale-ready and lowest TCO on the market, Hybrid Computing solution for today's and tomorrow's real-life problem solving.

A hybrid computing solution

Hybrid computing technologies
• Combine a broad variety of CPUs, accelerators and high-speed interconnect networks to run mixed HPC workloads or dedicate a full GPU and High-speed Ethernet-based system to Deep Learning.
• Run any type of workflow, on the same supercomputer, without compromising performance.

Hybrid computing environments
• Combined with BullSequana X Supercomputer Suite (SCS) and Bull Extreme Factory hub, BullSequana XH2000 integrates seamlessly in secure hybrid cloud ecosystems, allowing optimal workload orchestration between on-premises, private and public cloud environments.

Efficient by design

Energy efficient
• 100% of the system's critical components are equipped with our cutting-edge Direct Liquid Cooling (DLC) technology, enabling a data center PUE as close as possible to 1.0.
• SCS 5 Smart Power Management Suite optional software allows a fine-grained energy consumption monitoring, as well as dynamic power optimization, optimization, thus reducing the power envelope.

Application efficient
• SCS 5 Smart Data Management Suite optional add-ons enhances application performances by dynamically reducing IO related bottlenecks, without requiring any application change.
• Installed on BullSequana XH2000, the Atos optional Codex AI Suite empowers you to rapidly develop and deploy robust Machine Learning and Deep Learning applications. Atos AI experts will guide you through your projects.

Cost efficient
• Using XF hub, find the perfect balance between CAPEX – a BullSequana XH2000 on-premises system tailored to your everyday needs - and OPEX – on-demand competitive public or private cloud solutions.

Highly flexible

Modular and scalable
• Mix different types of current and future computing technologies (GPUs, CPUs) and interconnect networks (InfiniBand HDR, HDR100, BXI, High-speed Ethernet) within one system to create a supercomputer that matches perfectly your needs.
• Select the desired network topology (Full Fat Tree or DragonFly+) and pruning ratio.
• BullSequana XH2000 scales from one-rack, up to exaflopic systems.

Scalable
• BullSequana XH2000 scales from one-rack, up to exaflopic systems.
• For configurations up to 1200 nodes, SCS 5 SI - a lighter version of SCS 5 - is an easier and faster mean to install and to operate a super computer.

Exascale-ready

A true evolution of BullSequana X1000
• BullSequana XH2000 keeps all high standard technological features that have made BullSequana X1000 a leader in the race for exascale, while embracing customers' ever evolving needs for technological convergence.
• BullSequana XH2000 introduces DragonFly+ topology support, allowing greater scalability.

A futureproof solution
We are committed to make BullSequana XH2000 a sustainable long-term investment
• We will keep on improving our solutions and integrating new cutting-edge technologies within BullSequana XH2000.
• With the Open BullSequana program, Atos opens BullSequana XH2000 to 3rd party technology providers willing to integrate their value on this platform.
The BullSequana XH2000 flexible packaging

42U cabinet front view
- PDU + Power Management Controller
- Up to 6 x 15kW PSU shelves
- DLC & hot-pluggable
- Up to 32 compute blades
- Technologies provided by: Intel, Nvidia, ARM, AMD
- DLC & hot-pluggable
- Up to 3 Hydraulic chassis for Direct Liquid Cooling
- Inlet water temperature up to 40°C
- N+1 redundancy

42U cabinet rear view
- Up to 2 Management network switches
- hot-pluggable
- Up to 10 Interconnect Network Switches Technologies:
  • BXI
  • Mellanox HDR
  • High-speed Ethernet
- DLC & hot-pluggable
- Flexible mid plane
- Allows for:
  • routing customization
  • mixed interconnect bandwidths
  • two possible topologies (Full Fat Tree and DragonFly+)

The BullSequana XH2000 cabinet

Dimensions /Weight
- Mounting Capacity: 42U
  - Without UCM: 2020x750x1270 mm (79.5x29.5x50 inches)
  - With UCM (max): 2400x750x1270 mm (94.5 x 29.5 x 50 inches)
- Without compute blade or UCM: 1,250 kg (2,756 lbs.)
- Packing weight (without compute blade or UCM, with pallet): 1,230 kg (2,712 lbs.)
- Max weight (fully equipped): 2,035 kg (4,487 lbs.) without UCM, 2,135 kg (4,707 lbs.) with UCM

Power
- The power section, located at the top of the cabinet, has a form factor of 11.5 U. It is composed of a power distribution unit (PDU), power supply unit (PSU) shelves, optional ultra capacitor module (UCM) and a busbar to distribute power to all the components within the cabinet.

  Power Distribution Unit
  - It has a form factor of 2.5U. It protects and distributes power to the PSU shelves and HYCs. It also monitors the power circuit with a power management controller module. Power cables to be supplied to the PDU vary depending on the region of the world where the system is installed:
    • 3x 5G16 63A tri-phased 400V AC EU input power lines, or • 6x 4G16 63A tri-phased 208V AC US input power lines

  Power Supply Unit Shelves
  - Up to 6 x 15kW direct liquid cooled PSU shelves. Each shelf has a 15U form factor and contains up to 5x 3kW PSU blocks. The level and type of redundancy is selectable:
    • Level redundancy at the PSU block or at the PSU shelf level
    • Type: N, N+1, N+2, and 2N

  Ultra-Capacity Module
  - UCM chassis is optional. For the mitigation of micro power outages up to 300ms at full load or 800ms at 45% load when 3-phase uninterruptible power supply equipment is not present upstream in the data center infrastructure.

  Busbar
  - Busbar distributes power from the PDU to all the components within the cabinet. All components are hot-pluggable.

Cooling
- BullSequana XH2000 has a fan-less design and a unique Direct Liquid Cooling (DLC) technology that uses warm water up to 40°C to cool all critical components within the cabinet (compute blades, interconnect and management switches, and PSUs). The cooling system is composed of hydraulic chassis (HYC), primary and secondary manifolds, and an expansion tank.

  Hydraulic Chassis: HYC contain the heat exchanger system that allows it to achieve 95% of heat transfer between the primary and secondary manifolds. Up to 3 HYC are available depending on the redundancy type desired (N or N+1). Third HYC is for N+1 redundancy only.

  Primary and secondary manifolds: The primary manifold system connects the customer water loop to the HYC primary water inlets. The secondary manifold system connects HYC outlets to each compute blade, each management and interconnect switch and each PSU in the cabinet. All critical components are direct liquid cooled and mount directly onto the secondary manifold via hydraulic non-spill quick disconnect couplings.

  Expansion tank: The expansion tank prevents excessive pressure within the hydraulic circuit.
Management Network

Up to 2 management network switches, located at the top rear of the cabinet:
- Ethernet: up to 48 ports, 1 Gb/s or 10Gb/s, depending on customer’s bandwidth requirements

These switches are linked to top switches located in service racks:
- Ethernet: up to 48 ports, 1Gb/s or 10Gb/s depending on customer’s bandwidth requirements

Above 800 nodes, an ISlet Manager module (ISMA) is required with 2 redundant servers located in service racks.

Regulatory compliance / Certifications

Safety: EC, IEC, UL and CSA
Electromagnetic Compatibility: EC, FCC, ICES-03 and VCCI
Environment: RoHS II & WEEE directives, REACH regulation

Warranty

Standard warranty: 1 year
Extended Warranty: consult your local Sales representative

Compute blades

BullSequana XH2000 cabinet can accommodate up to 32 direct liquid cooled blades (20 at the front and 12 at the rear of the cabinet). Each 1U blade contains a cold plate with active liquid flow which permits to cool off all critical components by direct contact.

### BullSequana X2410 AMD blade

- **Design**: 1U blade comprising 3 compute nodes side-by-side
- **Processors**: 3 x 2 AMD EPYC™ 7002 Series processors
- **Architecture**: 3 x 1 motherboard
- **Memory**: 3 x 16 DDR4 memory slots (up to 128 GB, 3,200 MT/s DIMMs)
- **I/O slots**: InfiniBand HDR 1 port mezzanine board or BXI 1 port mezzanine board
- **Power Supply**: PSU shelves on top of XH2000 cabinet
- **Cooling**: Cooling by direct contact
- **Physical specifications (HxWxD)**: 44.45 x 600 x 540 mm (1.75 x 23.6 x 21.3 inches)
- **OS and software**: Red Hat Enterprise Linux & BullSequana X SuperComputer Suite support
- **Warranty**: Standard warranty: 1 year
- **Regulatory compliance**: Safety: EC, IEC, UL, CSA certifications; Electromagnetic Compatibility: EC, FCC, ICES-03, VCCI certifications; Environment: RoHS II & WEEE directives, REACH regulation

### BullSequana X1120 Intel blade

- **Design**: 1U blade comprising 3 compute nodes side-by-side
- **Processors**: 3 x 2 2nd Gen Intel® Xeon® Scalable processors
- **Architecture**: 3 x 1 Intel® C620 chipset
- **Memory**: 3 x 12 DDR4 memory slots (up to 128 GB, 2,933 MT/s DIMMs)
- **I/O slots**: InfiniBand HDR 1 port mezzanine board or BXI 1 port mezzanine board
- **Power Supply**: PSU shelves on top of XH2000 cabinet
- **Cooling**: Cooling by direct contact
- **Physical specifications (HxWxD)**: 44.45 x 600 x 540 mm (1.75 x 23.6 x 21.3 inches)
- **OS and software**: Red Hat Enterprise Linux & BullSequana X SuperComputer Suite support
- **Warranty**: Standard warranty: 1 year
- **Regulatory compliance**: Safety: EC, IEC, UL, CSA certifications; Electromagnetic Compatibility: EC, FCC, ICES-03, VCCI certifications; Environment: RoHS II & WEEE directives, REACH regulation

### BullSequana X1115 GPU blade

- **Design**: 1U blade with 1 accelerated compute node
- **Processors**: 2 2nd Gen Intel® Xeon® Scalable processors
- **Architecture**: 1 Intel® C620 chipset
- **Memory**: 12 DDR4 memory slots (up to 128 GB, 2,933 MT/s DIMMS)
- **I/O slots**: InfiniBand HDR 1 port mezzanine board
- **Power Supply**: PSU shelves on top of XH2000 cabinet
- **Cooling**: Cooling by direct contact
- **Physical specifications (HxWxD)**: 44.45 x 600 x 540 mm (1.75 x 23.6 x 21.3 inches)
- **OS and software**: Red Hat Enterprise Linux & BullSequana X SuperComputer Suite support
- **Warranty**: Standard warranty: 1 year
- **Regulatory compliance**: Safety: EC, IEC, UL, CSA certifications; Electromagnetic Compatibility: EC, FCC, ICES-03, VCCI certifications; Environment: RoHS II & WEEE directives, REACH regulation

### BullSequana X1310 Arm blade

- **Design**: 1U blade comprising 3 compute nodes side-by-side
- **Processors**: 3 x 2 Cavium® ThunderX2™ Armv8 Processors with up to 32 cores
- **Architecture**: 3 x 1 motherboard compatible with Cavium Borg reference platform
- **Memory**: 3 x 16 DDR4 memory slots (up to 128 GB, 2,933 MT/s DIMMS)
- **I/O slots**: InfiniBand HDR 1 port mezzanine board or BXI 1 port mezzanine board
- **Power Supply**: PSU shelves on top of XH2000 cabinet
- **Cooling**: Cooling by direct contact
- **Physical specifications (HxWxD)**: 44.45 x 600 x 540 mm (1.75 x 23.6 x 21.3 inches)
- **OS and software**: Red Hat Enterprise Linux & BullSequana X SuperComputer Suite support
- **Warranty**: Standard warranty: 1 year
- **Regulatory compliance**: Safety: EC, IEC, UL, CSA certifications; Electromagnetic Compatibility: EC, FCC, ICES-03, VCCI certifications; Environment: RoHS II & WEEE directives, REACH regulation
### Interconnect Network & Topologies

The Interconnect Network is composed of the Interconnect Network switches and a uniquely designed network connection mid-plane.

<table>
<thead>
<tr>
<th><strong>Interconnect Network switches</strong></th>
<th>Up to 10 direct liquid cooled Interconnect Network switches. They are located at the top rear of the cabinet. 3 technologies are available:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>• InfiniBand HDR/HDR100: 200Gb/s (HDR) or 100 Gb/s (HDR100), 40 ports (HDR) or 80 ports (HDR100)</td>
</tr>
<tr>
<td></td>
<td>• Bull eXascale Interconnect (BXI): 100 Gb/s, 48 ports</td>
</tr>
<tr>
<td></td>
<td>• High-speed Ethernet: up to 100 Gb/s, up to 48 ports</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th><strong>Network connection midplane</strong></th>
<th>It is located at the center of the cabinet. It brings 3 major benefits:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>• Flexibility to customize routing of the compute blades to the interconnect network switches</td>
</tr>
<tr>
<td></td>
<td>• Possibility to mix different interconnect network speeds and/or technologies</td>
</tr>
<tr>
<td></td>
<td>• Selection of the optimized interconnect network topology (Full Fat Tree, DragonFly+)</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th><strong>Topologies</strong></th>
<th>BullSequana XH2000 supports two topologies:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>• Full Fat Tree: a proven network architecture that provides very good worst-case blocking performance</td>
</tr>
<tr>
<td></td>
<td>• DragonFly+: a cost-efficient topology that allows greater scalability than Full Fat Tree</td>
</tr>
</tbody>
</table>

### Software

<table>
<thead>
<tr>
<th><strong>SuperComputer Suite version 5</strong></th>
<th>SCS 5 is the software layer that manages the way BullSequana XH2000 handles workloads. Two versions are available depending on the size of the system:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>• SCS 5 Single Island: up to 1,200 compute nodes</td>
</tr>
<tr>
<td></td>
<td>• SCS 5 High-end: 1,200 nodes and above, up to Exascale requirements</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th><strong>SCS 5 system’s dedicated add-on packages</strong></th>
<th>Power management: SCS 5 Energy Optimizer and SCS 5 Dynamic Power Optimizer</th>
