
Telehealth: Delivering high quality care at a distance

The COVID-19 crisis has put a spotlight on the need for healthcare delivery to evolve to face new challenges. The telehealth solution from Atos can provide the answer.

Trusted partner for your Digital Journey

Atos

Healthcare providers are under tremendous pressure to maximize their limited resources and deliver high quality patient outcomes in the age of social distancing. As healthcare companies navigate this challenging period and look to deliver optimal care with minimal exposure, they must explore how high-tech solutions can achieve these competing goals.

Atos Solution

The **telehealth solution** from Atos incorporates an integrated video collaboration and communication platform that enables healthcare companies to deliver virtual care to patients, right in their own homes.

Telehealth solution helps screen large numbers of patients, remotely check vitals for isolated patients, deliver in-home monitoring and treatment for patients with mild conditions, and perform post-discharge patient follow-up. Its features include:

E-scheduling, to maximize the capacity of human resources and systems

Tele-medicine, with virtual meeting rooms for clinicians and patients through healthcare provider websites

Tele-consultation between clinicians and specialists/ nurses/ healthcare teams

Virtual capture of patient vitals

Patient info and education websites

One Size Does Not Fit All

The Atos telehealth solution is a foundational technology that can be customized based on your pandemic management strategy to direct users towards your organization-specific endpoints, such as:

- Flagging high-risk COVID-19 cases for monitoring and triage, or providing a link to a COVID-19 help team
- Delivering electronic communications to set-up virtual consultations
- Providing guided patient notifications with automated emails and phone calls for appointments, medication reminders, etc.
- Enabling remote monitoring and alerts for high-risk patients through integration with wearable medical devices
- Integration with electronic health records and payment systems

Atos Advantage

- Rapid deployment of a functioning telehealth platform in one to two weeks.
- Readily available standard operating procedures for video consultations and clinical safety
- Implementation and adoption monitoring
- Tailored end-user training for clinicians and patients

Benefits

- Minimizes patient exposure and increased access to care
- Slows transmission and spreading incidence over a longer time period
- Keeps patients connected, with the ability to consult a physician from home during a lockdown
- Optimizes the workforce, with the ability to leverage retired or quarantined clinicians to provide consultations
- Reduces the overall cost of care
