
Supply Chain solutions for CPG

Consumer Product Goods (CPG) and Food & Beverage (F&B) companies increasingly use their supply chain to compete and gain market share. It's no surprise, therefore, that technology and process upgrades at forward-thinking companies are on the rise. Supply chain excellence has become an essential element of overall business strategy, where increasing value to customers is not just management's, but everyone's, business. Offerings include a full scope of SAP and custom developed solutions/services on a platform that integrates with each customer's application landscape.

How can Atos help?

Atos Supply Chain Offers

Integrated Business Planning

The solution supports online collaboration and efficiency, reduces the iterations in business planning and simulations, provides single calculations across the whole SCM function and maximizes inventory utilization.

Customer Replenishment Planning

The application enables customer inventory insights and avoidance of out-of-stock situations, improves stock management/product allocation, and increases forecast accuracy and Service Level KPIs.

Quality Online Monitoring - Statistical Process Control

This web-based application is a hybrid between internal and external with two-way integration with SAP for transactional and master data.

Multiple scenarios for Warehouse Management - from paper based to fully automated

Fully integrated solution encompassing various levels of WH complexity while covering all WH processes.

Vision Picking

Solution that covers all picking activities in the warehouse to be executed utilizing 'Smart glasses' and augmented reality technology. It also has voice communication with the back-end system.

Continuous move

Solution to allow Dispatchers at group level to plan several individual continuous/round trips using a single vehicle from a transportation company and interact with carriers via Transportation portal.

Control Tower

Fiori-based online monitoring of 14 Logistics KPIs which can drill down from high-level results to document level.

Challenges & Benefits

**Business challenges
you must face**

**Can be solved with our
tailor-made solutions.
What are the benefits of
using them?**

How to reduce manual work and human mistakes?	Automate manual work for entering and consolidating data.
How to minimize quality/food safety incidents?	Use a single QM Monitoring system across customer environment supported centrally with real-time online visualization and immediate feedback and alarms for operators in case manufacturing processes become unstable/out of control/out of specification.
How to enhance traceability?	Enjoy full traceability according to EU FB requirements and online updates of core ERP system with document creation for every single move/scan.
How to better manage the stock?	Reduce time and effort for planning/ordering by optimizing production planning.
How to improve time-consuming processes?	Have online updates and document creation in core backend system.
How to reduce costs?	Reduce SC cost and improve Free Cash Flow through cross-border optimization and consistent application of performance excellence programs; achieve shorter time-to-market.
