

### **Atos commits to net-zero carbon emissions by 2035, setting the highest decarbonization standards for its Industry**

**Paris, June 24, 2020 – Atos, a global leader in digital transformation, announces today its commitment to achieve net-zero carbon emissions by 2035, a date which is 15 years ahead of the ambitious aim of the UN Paris Agreement on Climate Change to limit the global warming of the planet to 1.5°C compared to pre-industrial levels (net-zero by 2050). This decision expands Atos’ ambitions on decarbonization even further, positioning decarbonization as a core element of its growth strategy and the Company as the decarbonization leader in its Industry.**

This commitment will see Atos reduce by half all the emissions under its direct control by 2025 (GHGP scopes 1 & 2) and achieve the same reduction for the emissions under its influence by 2030 (GHGP full scope 3). For the emissions under its control, Atos will continue to offset 100% of its residual emissions through certified carbon offsetting projects. For the emissions under its influence, Atos will progressively include them into its global offsetting program, so that it reaches net-zero emissions by 2035.

*"Atos aims to pioneer decarbonization for the benefit of its customers, all its stakeholders and society at large, by transforming the way digital technologies are designed, developed and used", says **Elie Girard, Atos CEO**. "Today's decision to achieve net-zero CO2 emissions by 2035 marks a new step forward. I am very proud of our commitment which definitively positions Atos as worldwide leader in decarbonization".*

[Atos is among the signatories](#) of the "[Business Ambition for 1.5°C](#)" pledge, launched in mid-2015 in the run-up to the Paris Climate Change Conference. For the last decade, Atos has been pioneering decarbonization, having decreased its own carbon intensity (CO2 / M€ Operating Margin) by 60% between 2012 and 2019, having reached the first milestone of the [SBTi 2°C](#) ten years in advance and also having reached carbon neutrality for the emissions under its direct control since 2018. Atos has, among other rankings, [topped the DJSI index](#) in its industry since 2018, and has the Ecovadis Gold and [Carbon Disclosure Project A rating](#).
