

ATOS

Overview

Atos is a global integrator for Microsoft Azure and SAP solutions with a high profile in the German market. One of the core elements of the Atos solution portfolio in the SAP on Azure environment is the Orchestrated Hybrid Cloud for SAP that enables the use of multiple cloud structures, coordinated by a consolidated ServiceNow ITSM portal.

Strengths

High-profile Microsoft certifications for Azure Services and SAP: Through its close collaboration with both software companies, Atos can quickly implement technological innovations for SAP to Azure cloud migrations.

Highly experienced: Atos supports around three million SAP users through a comprehensive portfolio of SAP managed service offerings. For a standardized procedure, the French provider offers technology transformation services (TTS) offers TTS-Practice Application Platforming, which offers cloud services (especially Azure) and SAP Services in combination.

Innovative SAP Cloud integration and operations portfolio: The service offering includes high-level automation for deployment within SAP HANA, NetWeaver and the Business Suite as well as skills for granular billing and monitoring. Its hybrid cloud competencies are highly developed and assist in decision-making, especially for SAP customers.

Caution

Atos should aggressively market parts of its innovative portfolio, such as business model process analysis, to keep up pace with business-oriented providers in the market. These services are less known compared to the catalog of services for technical migration.

2020 ISG Provider Lens™ Leader

As a specialist in complex hybrid cloud solutions, Atos is a suitable partner with strong competencies in SAP and Azure solutions.
