The Atos University - BTLIC has demonstrated in 2019, that it is a key cornerstone of the Atos Digital Transformation Journey. With more than 8,500 unique individuals trained and more than 500 training courses delivered, the BTLIC has established itself as a key enabler for the skills transformation into the digital world. The continuously high feedback scores from the learners show that the services are of consistently outstanding quality. The trainings are so good and credible that even external clients have asked the team to develop trainings for them.

Atos University – BTLIC with its focus on ‘Strengths Enhancement’ rather than ‘Weakness Correction’ has successfully blended rigour with relevance to create excitement in the space of learning. The secret behind this success is the team’s commitment to the home grown “Seven C” model which they have devised, and nurtured. It consists of: Content, Context, Capacity, Capability building, Custom made, Cost effectiveness, and Culture & Camaraderie. To the team’s “Seven – C Model”, I want to add the Eighth C - “Consistency”. It is consistency that paves the way for making Learning an integral part of Culture. The month – on – month consistency that Atos University – BTLIC team has demonstrated over the past two years on key parameters like Persons Trained, New Programs Developed, Satisfaction Index etc. is commendable. For the years to come, I recommend to the team to stay focused on virtualization, innovations in Learning and expansion of its global foot print in order to create a sustainable impact. I want to take this opportunity to thank Dr Lal and the entire team for their dedication, commitment and passion to deliver best in class learning services every day to our clients - internal learners as well as external customers. For me the Atos University - BTLIC is a key enabler to transform the entire Atos Group into a Learning Organization.

“Consistency paves the way for effective and sustainable change”
Achievements

- Programs: 510
- Participants: 18,750
- Person Days: 24,400
- Program Days: 740
- Feedback: 746/8
I was not at all surprised when Atos University – BTLC scored an amazingly high 7.4 satisfaction score on a 8-point scale and delivered more than 24000 Participant Days of training in the year 2019. Having worked very closely with the team, I am personally aware about Atos University - BTLC's capability of handling high volumes with world class quality. It is extremely satisfying to see how Atos University - BTLC which celebrated the first anniversary of its foundation in January 2019 only, has grown with a portfolio of 300 plus offerings of which a sizeable chunk is in the area of Digital Technologies. The high demand, and satisfaction rate bears testimony to the quality and relevance of its offerings but to me, what really sets them apart is the wonderful enthusiasm of the team that gives them the ability to create a serene, conducive environment wherein learning happens spontaneously. Atos University – BTLC has, within just 2 years of its existence established itself as a strategic vehicle for creating the organization of tomorrow. We can be proud of these achievements and of this fantastic team, always so involved, committed and engaged! Congratulations Team!

I am so happy with the quantifiable results of Atos University - BTLC with more employees trained in more technologies, and more competencies delivered than ever before. Complimenting the Atos internal first program, Atos University - BTLC is focused on providing technical, leadership, and skill enhancement needed to ensure that Atos employees are equipped correctly in the mind and heart when delivering to clients. Consistency, with quality, embeds learning as an integral part of the culture and skilling success at Atos. As a result of this team’s amazing efforts, skilling and certifications have become a key part of the Atos DNA. In 2020, I look forward to the expanded portfolio of Atos University - BTLC as it continues to deliver virtualized training programs worldwide, continues to innovate in learning content and delivery, and touch the lives of each Atos employee to create a lasting impact.

In 2019, together with Atos University - BTLC we have successfully managed to bring our digital transformation skills evolution to a new level. The programs have significantly contributed to our more than 50000 digital certifications in 2019 and we see a massive increase in uptake of modules and programs across the globe. Atos University - BTLC has become a recognized brand within Atos for the delivery of high-quality content for digital skills – in content creation as well as content delivery. Knowing that continuous learning is one of the key enablers for digital transformation, we are looking at a bright future for the Atos University - BTLC in 2020. In 2020 we will go further towards making the Atos University - BTLC the number one provider for digital skills within Atos – an objective supported by BTLC’s impressive combination of value, efficiency and quality.
At the end of May and beginning of June 2019, I had the honour and pleasure for two consecutive weeks to accompany cohorts 18 and 19 of the GOLD for Business Leaders program at Atos University - BTLC in Bengaluru. For a lot of them it was their very first time in India. This was a fantastic learning experience both culturally and business wise. We enjoyed Atos University - BTLC’s great facilities for a series of lectures and workshops, visited the Customer Experience Center, met with several Atos executives based in India or visiting India. We completed this with a number of company visits and cultural experiences. It was my second time at Atos University - BTLC and each time I must admit I have been amazed by the warmth, the hospitality and the professionalism of the team. I believe that each GOLD participant, as myself, will have life-lasting memories of this training at Atos University - BTLC in 2019!

Working with Atos University – BTLC has always been a pleasure. Some of my colleagues from IIM(B), and I have been associated with many of its Leadership Development Programs, and some of its Organization Development initiatives. Since they operate on the philosophy of strengths enhancement, the enthusiasm that their programs generate is infectious. They plan and prepare for the programs, right from the conceptualization stage very diligently and very often they provide interesting insights and inputs which makes the sessions conducted even by guest faculty very relevant. I suppose, that is in keeping with their belief that the learning offerings must be a right balance of ‘Rigour’ and ‘Relevance’. One unique feature that I noted here is the extra mile that they do in order to provide the international participants an insight in to the Culture of the land to make their experience more meaningful, rich and unforgettable. On a personal note I wish to make a special mention of the team that works on these programs. They really work hard towards providing a very serene environment not only for the participants but also for the guest speakers – they create an environment where ‘Learning happens seamlessly and spontaneously’. 
We Are BTLC

An experiential learning center for creating a meaningful impact globally

300+ Seats
10+ Collaborative Spaces

State of the art infrastructure
Trainers. Designers. Researchers.
