

Accelerate Innovation with SAP on Google Cloud

For over 35 years, Atos and SAP have been driving business transformation and digitizing applications for the enterprise. With our joint expertise, there is no one better positioned than Atos to drive intelligent enterprise transformation on Google Cloud.

With the SAP migration deadline approaching and the implementation rate increasing, more companies are realizing the benefits of a digital enterprise core with SAP and non-SAP workloads. Atos helps SAP customers simplify their transition to the Google Cloud to drive agility, efficiency, cost savings, and ultimately increase the pace of innovation.

Enable Continuous Innovation with SAP on Google Cloud

1. Upgrade

Experience basic cloud benefits including scalability, elasticity, and total cost of ownership.

2. Run

Leverage advanced capabilities for Automation (Platform Provisioning), Availability (Live Migration), Performance Management, and Flexible Commercial Models.

3. Innovate

Utilizing serverless, microservices architecture to build data analytics by integrating SAP and non-SAP data sources using AI/ML capabilities.

Atos Digital Platforms for SAP

Atos supports customers through every stage of the SAP to Google Cloud transformation, from assessment through driving innovation with analytics and ML/AI.

- Assessment**

2-6 week assessment based on use cases such as cloud journey, S/4 HANA transformation roadmap, process mining, and PoVs for conversion, implementation, and user experience.
- Transformation**

Simplified transformation to S/4 approach with packaged modules to cater to customer needs.
- Cloud Migrate & Run**

Migrate SAP workloads to Google Cloud using automation and accelerators to improve the speed of provisioning and migration while reducing cost.
- Analytics**

Transformation to serverless architecture enhanced with rapid deployment SAP analytics accelerators, including SAP integration with BigQuery for better business insights with AI/ML capabilities
- Apps Management**

Next generation SAP Application Management supported by automation and AI/ML using the Atos SAFE platform to increase efficiency and reduce cost.

- Application Development

Expertise

SAP on Google Cloud

Case Studies

Melitta:

Implementation of SAP S/4HANA hosted on Google Cloud Platform providing the cloud hosting and OCM services.

Global Automobile Manufacturer:

Partnered with Atos to migrate SAP BW on HANA and Solution Manager landscapes to GCP, as their existing infrastructure was end of life.

Accelerate Innovation with SAP on Google Cloud

Common Drivers

Data center closure, tech infrastructure refresh, or contracts renewal

Business drivers, including mergers and acquisitions, creating requirements for new SAP functionality or greenfield projects

Overall TCO (CapEx vs OpEx)

Service improvement and experience

Improving security postures

Customer Benefits

Risk Management

Zero-downtime infrastructure maintenance

Continuity

Business critical systems run continuously and economically at all times

Agility

Deploy faster with automated templates

Insights

Combine and analyze data from SAP and other sources in BigQuery

Innovation

Allows you to focus on driving innovation for the business, not infrastructure

TCO

Improve overall TCO through Cloud Native tools and flexible commercial models

Maven Wave / Atos Difference

Google Cloud is the preferred cloud partner for Atos in all SAP engagements. Dedicated Global SAP Google Cloud Task Force comprised of industry-leading experts. Launch partner of the SAP Cloud Acceleration Program (CAP) helping customers simplify migration to the cloud.

Atos SAP on Google Cloud Co-Innovation Initiatives:

- SAP Analytics Accelerators: Rapid Deployment Templates for SAP Analytics in BigQuery
- Provide Bare Metal as a Service for various workloads
- Co-innovation around SAP automation and operations

Getting Started

Get started [SAP to Cloud Assessment](#) in which Atos will define a cloud strategy and provide a roadmap. This offer is free of charge and only takes 1 week.*
