Provide the expertise and experience to help organizations accelerate modernization and transform their business using Public Cloud the smart way.

However, some organizations are struggling to realize the benefits. The worldwide public cloud services market is forecast to grow 17% in 2020 to total $266.4 billion up from $227.8 billion in 2019, according to Gartner, Inc.

Atos Digital Cloud Services

Supporting Amazon Web Services, Microsoft Azure and Google Cloud Platform, Atos DCS delivers a layered infrastructure made up of:

SERVICE PATTERNS
Unique, ready-made and customized to meet individual business needs, or developed bespoke.

CLOUD CORE
A standardized approach to operate and manage cloud resource.

Plus an end-to-end framework approach to cloud strategy and adoption.

Enterprise-ready service patterns – innovating applications for competitive advantage. Designed to efficiently deliver your business objectives and significantly reduce costs. They enhance the speed of innovation to create a new application, e.g. to grow, open a new market, or expand product and service features, so you can achieve new levels of efficiency, flexibility and cost-savings.

Why Atos DCS?

Increased speed of both innovation and service to the end-user

Improved time to value and business performance

Predicable infrastructure costs

Reduced costs through right-sizing and prioritising and optimising applications

A flexible storage resource – easily scaled up and down

Enhanced security and visibility to protect business continuity

Continuous guidance on adopting and managing cloud-native services to reduce costs and improve efficiency, and to modernise and transform your organization

BENEFITS

Technology-agnostic

Public cloud provider certified experts

A full life-cycle services provider

Experts in designing, building and managing business-critical applications

The Cloud Is Powered by Intel

Intel powers the leading public cloud service providers with compatible Intel® Scalable® processors, networking components, and solid-state drives, along with a rich portfolio of existing technologies and a broad choice of industry collaborators. When it comes to deployment, the cloud is powered by Intel® technologies delivering reliable, scalable, workload-optimized performance across all types of applications and services.
