

Close that Gap in the Clouds

Seamlessly extend your corporate environment to public clouds

Cloud is the Norm

75%

Of orgs using cloud have a cloud-first strategy¹

85%

Aim to have the majority of their workloads on the cloud by the end of 2020

24%

Plan to be cloud-only by the end of the year²

Organizations use it so they can

70% Adopt AI

70% Move into IoT

58% Perform data analytics

49% Improve customer experience³

But the dream isn't coming true...

44% have difficulty migrating legacy applications

39% face security, governance, and risk issues

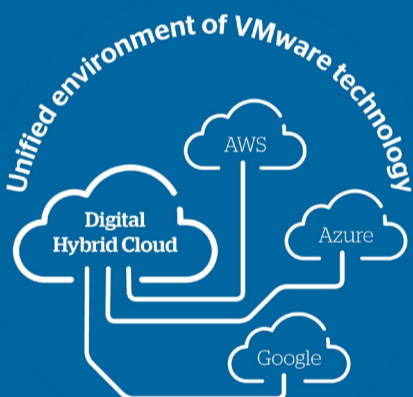

36% struggle with inflexible legacy technology systems

Most worrying of all

A shocking 35%

lack a company-wide cloud deployment strategy⁴

With professional and managed services from Atos OneCloud

One hybrid cloud environment

What companies need is a way to close the gap between their corporate cloud and the public clouds they want to use.

An integrated software-defined infrastructure stack that spans the private data center and public clouds.

This would make it easier to

Support public cloud strategy

Rationalize data centers

Advance DevOps and application management

Strengthen disaster recovery

Move to green energy

Boost capacity

Get your whole corporate hybrid cloud working as one

Utilizing a software-defined data center service in public clouds built on familiar VMware technology complimented by Atos One Cloud architecture, migration services and managed services.
