The Rise of AIOps Research Report, AppDynamics 2019

Citizens expect flawless performance from their digital experiences—both public and private sector. Government departments, regardless of what they deliver, are now in the customer experience business. That's the new reality. AppDynamics helps government departments deliver consistently flawless digital performance by connecting end-user experience and application performance to customer outcomes.

AppDynamics monitors, correlates, analyzes, and acts on application and business performance data in real time. This automated, cross-stack intelligence enables developers, IT ops, and department directors to make the mission critical and strategic improvements that satisfy customers at every moment.

"Atos has proven themselves to be a trusted AppDynamics sales and delivery partner across public sector and enterprise. Their teams are seen as thought leaders in the service management space. The Atos multi-cloud offering underpinned by AppDynamics, combined with their deep ServiceNow expertise, places them at the forefront of the AIOps conversation, making them a great choice for any AppDynamics project."

Luke Rogers, Are VP Northern Europe, AppDynamics

It's all about the business

The health of your department is inseparable from the health of your applications. So, the modern application team must include dev, ops and department directors. To deliver actionable, contextual answers for all stakeholders, this team requires end-to-end performance monitoring and management.

Application Performance Monitoring

Ensure department applications meet customer needs with application mapping, dynamic baselining, and code-level diagnostics to find bottlenecks, address inefficiencies and speed performance.

End User Monitoring

Create better customer experiences and resolve issues quickly by automatically capturing errors, crashes, network requests, pageload details, and other metrics.

Agency Performance Monitoring

Understand how application performance impacts customers and departments with contextual insights for every transaction, code release, or complete service.

Infrastructure Visibility

Make sure application performance is fully supported by your infrastructure with server, database, and network performance visibility.

How does AppDynamics change my world?

Evaluating customer journeys holistically is critical. AppDynamics helps the modern application team proactively prevent problems, validate and prioritize IT investments, and understand exactly how application code impacts business outcomes.

Dev and Test

Release with confidence—every time. Our self-learning, real-time analytics detect anomalies well before production, so you can deliver quality code with complete confidence.

IT Ops

Turn your war room into a break room. We automate end-to-end flow and observability for faster remediation, significantly reducing mean time to innocence.

Department

You're not interested in containers and APIs, you're interested in customer experience and value. We deliver highly contextualized data to help you drive customer success.

About Atos

Atos is a global leader in digital transformation with over 110,000 employees in 73 countries and annual revenue of over € 11 billion.
