Creating a consumer-centric, digitally optimized, and more sustainable future for Food & Grocery Retail

Gain the insights required to create optimized digital experiences, drive in-store spend and improve supply chain simplification and efficiency.

Partnering with retailers to deliver global solutions

Build a resilient, adaptable, and transparent supply chain to reduce operational costs, enhance impact, and reduce risk.

Partnering with retailers to deliver global solutions

Building with customers to create next-generation shopping experience

Atos has over 35 years’ experience of partnering with clients in the retail and grocery markets. And as consumers demand more sustainable, local, and health-conscious offerings, providing authentic, ethical, and traceable credentials becomes increasingly important. To address this, retailers can leverage technology solutions to improve visibility and traceability across the supply chain.

Over 500,000 coolers in the UK are used every year to store perishable goods. And as consumers demand more sustainable, local, and health-conscious offerings, providing authentic, ethical, and traceable credentials becomes increasingly important. The CoolCold solution by Atos, powered by blockchain technology, ensures security, integrity, and transparency in the cold chain. It streamlines the logistics and supply chain, reducing waste and improving operational efficiency.

Transforming the in-store experience to drive loyalty and spend
