

# Atos OneCloud Plan

Briefing

# Cloud Journey Advisory Offerings

Realize the value of technology to solve current challenges and create new business opportunities.

## Atos OneCloud Plan

Develop a digital strategy based on business drivers and define an actionable path forward. Can be company-wide or targeted at a specific business unit.

## Additional Cloud Advisory Offerings

---

### Datacenter Exit Plan

Develop a plan to migrate your current datacenter to a **hybrid cloud** and **outsource** your datacenter operations.

### Technology Delivery Transformation

Transform your software delivery to be more **agile** and leverage automation such as **DevOps** and **DevSecOps**.

### Application Modernization

Determine the most effective method for modernizing **mainframe** and other **legacy applications**.

### Digital Product Strategy

Design a digital product and associated **user experience** for a specific business capability or set of use case.

### Hybrid (or Multi-Cloud) Strategy

Understand the benefit of **different cloud models** and how they can best align to your business use cases with a focused security recommendation.

### Modern Data Platform

Define a **strategy** and supporting **architecture** to aggregate, store, and analyze data more efficiently.

### Cloud Security

Assess the current and desired environments and identify a list of prioritized initiatives to improve **security**.

### AI/ML Platform

Define a strategy and supporting architecture to maximize the **efficiency** of your data and analytics team;

## Accelerate your ability to successfully execute on your digital transformation goals.

### Outcomes

---

Create a **clear vision** for how to leverage cloud to enable digital capabilities and drive your targeted **business outcomes**.

Build a defined **backlog of executable initiatives and roadmap** driven by business value.

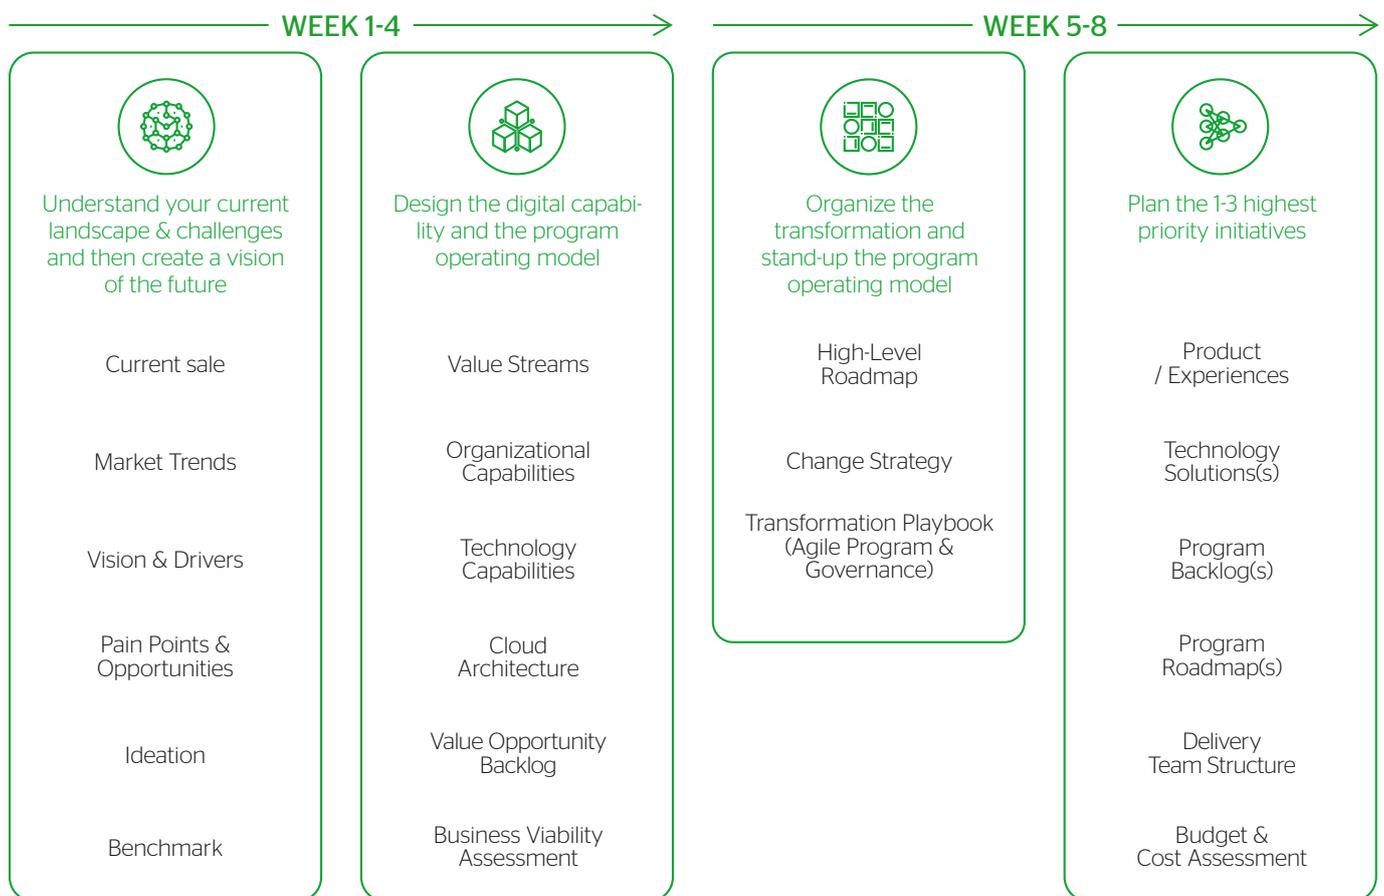

Stand-up an **agile execution model** and **change strategy** that will accelerate and sustain delivery.

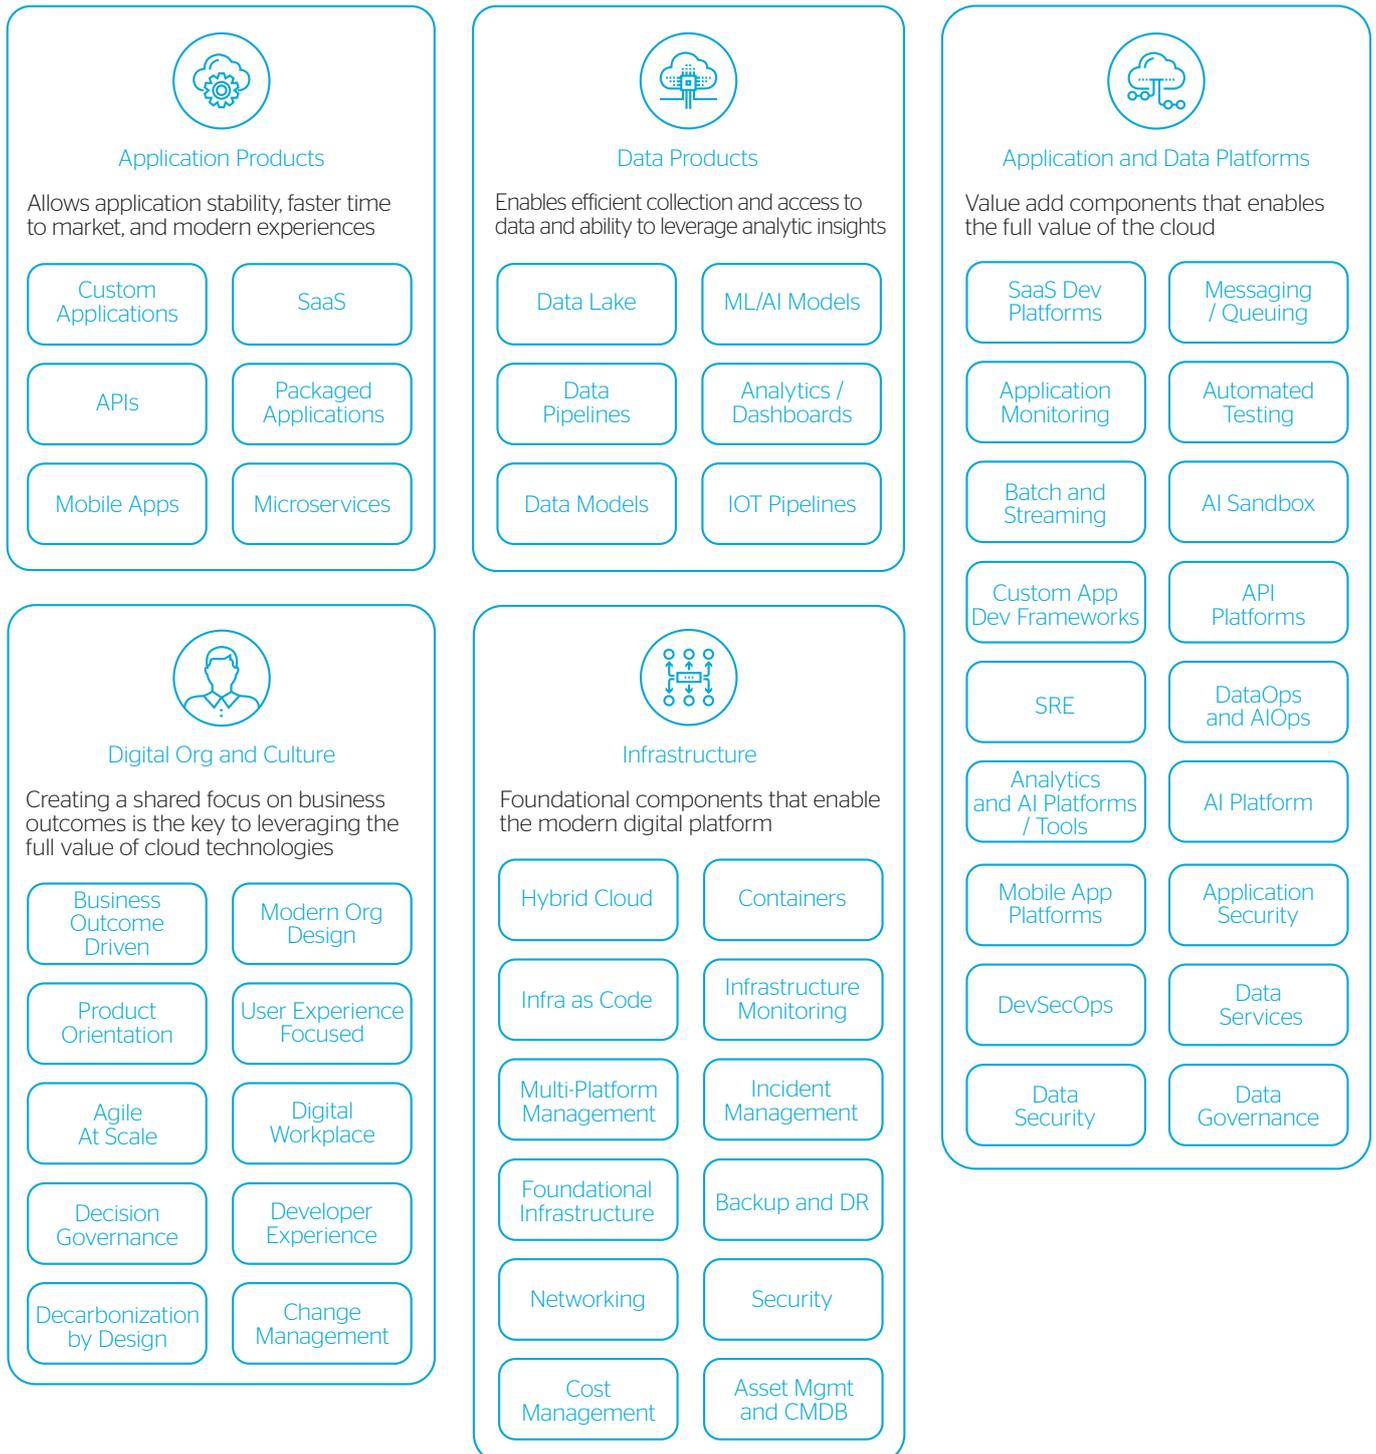

# Atos OneCloud plan approach

A highly collaborative approach that starts with realities of today, generates targeted changes toward future state, and produces an executable roadmap guided by business outcomes.

The transformation streams focus on categories within 5 primary areas of the target digital model.

# Key Deliverables

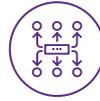

## Create organizational alignment to execute a large scale cloud transformation

---

### Prioritized Business Drivers

Create initial vision for how cloud can enable digital transformation by aligning business drivers to value opportunities.

### Current Capabilities Benchmark

Create an initial vision for how cloud can enable business transformation and assess the current maturity of your current capabilities.

### Prioritized Initiative Backlog

Define set of initiatives and prioritize in a backlog to prepare iterative transformation.

### Transformation Playbook

Define the program structure, process, and change strategy to execute a successful transformation.

## Begin immediate execution of your 1-3 highest value initiatives

---

### Targeted Solutions and Future Designs

Solution architecture diagrams that highlight how to leverage cloud technologies. Based on the chosen initiative might include product design and/or organizational design solutions.

### Program Roadmap

Organize the backlog of work into a high-level timeline with an understanding of critical milestones and dependencies.

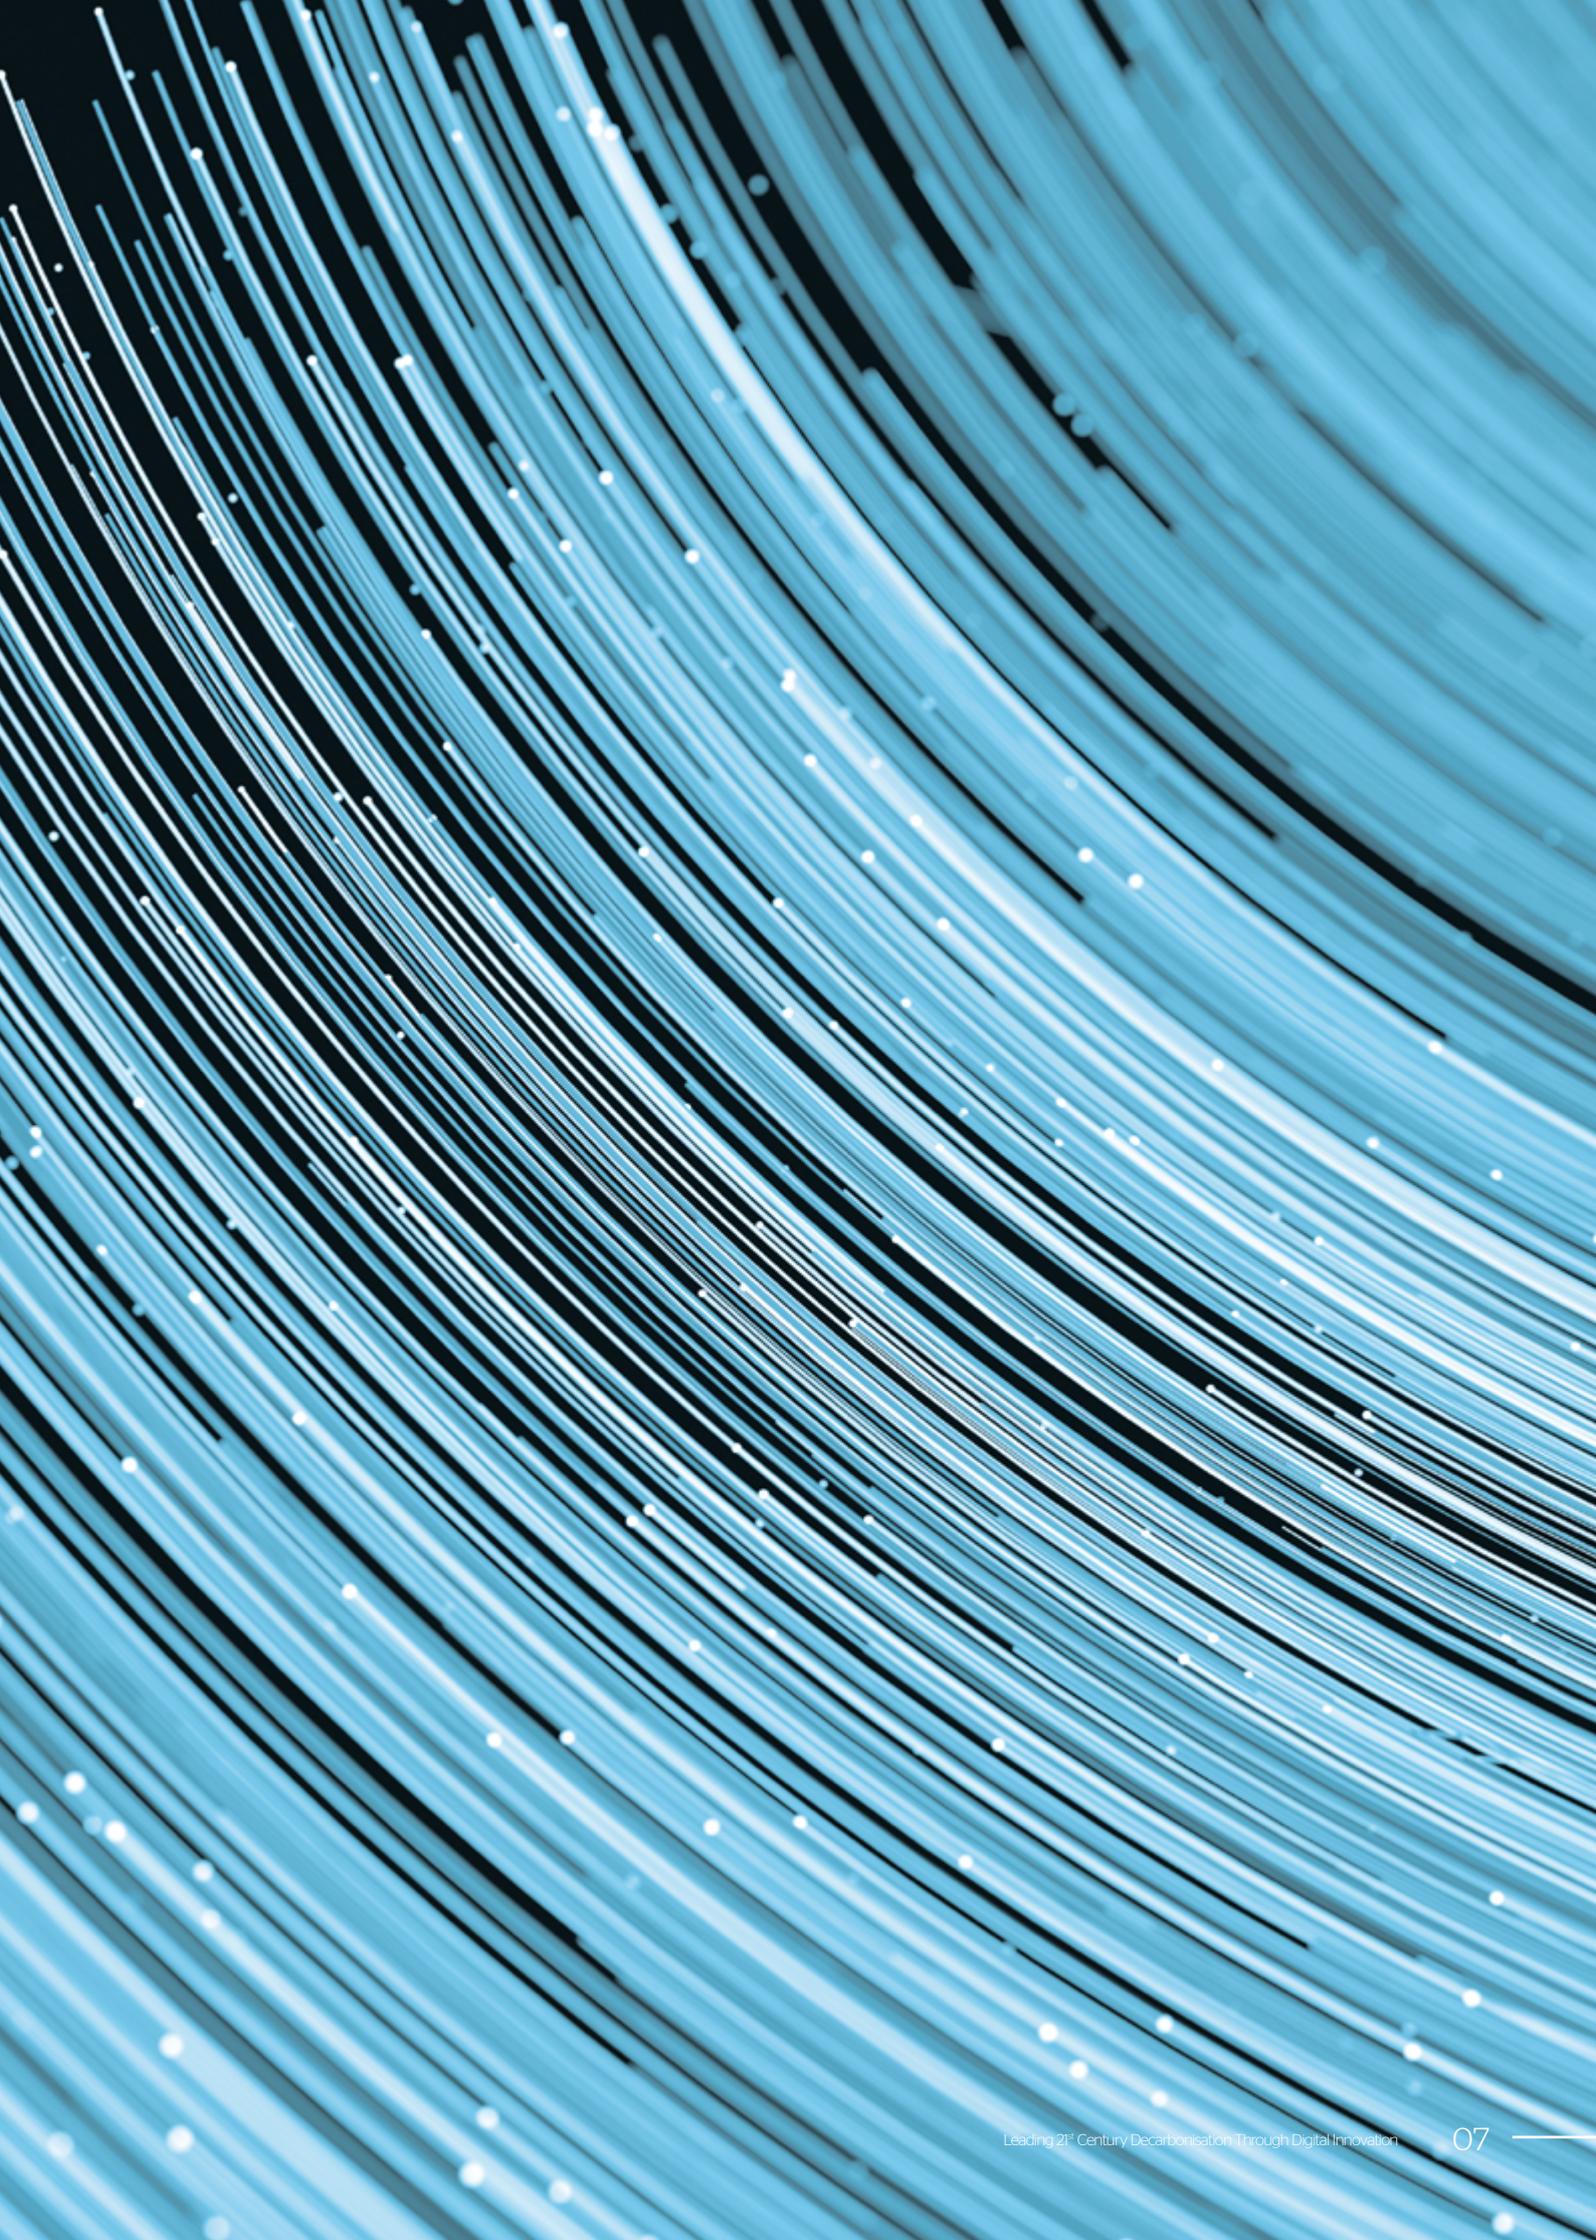

### Team Structure, Cost, and Viability Assessment

Estimate the implementation cost and validate against expected benefits.

## Build your cloud forward future
