

Welcome to the new issue of Atos Digital Security Magazine!

Your guide for the digital security journey.

Click on each article to discover more 

Atos Digital Security

Read how Atos aligns with the revolutionary changes the entire world is undergoing driven by the convergence of the digital and physical worlds.

A day in the life: intelligence-driven threat hunting

Discover the life of a threat hunter on his search for malicious activities using intelligence-driven tools.

Chemical solutions company transforms cybersecurity from reactive to proactive

Explore why a leading chemical manufacturer chose managed detection and response to secure intellectual property at its centers from online threats.

Security consulting in the Digital Age

In the Digital Age, consultants must pursue outcomes beyond compliance and incidents concerns and deliver advisory services accordingly.

Dassault Aviation project: A team that excels in customer delivery

Securing data in aviation comes with several challenges. It is essential to preserve the continuity of on-board processes and the security of communication networks.

The two sides of the operational technology security equation (and why it's risky to focus on only one)

Today's risk-intensive operational technology (OT) security demands a secure atmosphere with zero downtime. Read the expert advice on how to mitigate these risks.

Securing the democratization of Space

Space is one of the largest upcoming challenges on the horizon. Discover how satellite signal integrity can be protected.

The challenges of homomorphic encryption

Is homomorphic encryption (HE) the future of cloud security? In this blog, our expert explains what is HE and what its potential applications and challenges.

The genesis of Atos managed detection and response service

"If you are blind anywhere, you are blind everywhere." Discover how managed detection and response (MDR) helps detect deep attacks across all environments.

The voice of the customer: Ørsted

The convergence of IT and OT is one of the leading security challenges that any industry faces today. In this blog, Ørsted shares how they addressed it.

The challenge of gender diversity in cybersecurity

The importance of hiring young female talent is crucial for Atos to pioneer the future of digital security. We strive to encourage women to pursue cybersecurity.
