

# Future-Ready with SAP S/4HANA on Azure

## Challenge

Looking to get the most advanced application and infrastructure solutions to support the company's growth, Zentiva wanted to build a reliable, highly-available and scalable SAP solution that was GxP compliant, with significant remote execution in only 12 months. With a presence in 25 countries worldwide, this fast-growing global pharmaceutical company needed to make its high-quality, low-cost medications accessible to even more people.

## Solution

Atos designed, built, and implemented a complete Microsoft Azure infrastructure and SAP S/4HANA application landscape that was consistently supported on both the infrastructure and SAP application levels. In addition, Atos developed a learning and training program to enable Zentiva employees to use the new technology and features of SAP and Azure.

## Results

30%

reduction in IT spend

Reduced capital expenditure

20%

reduction in operational costs

Increased competitiveness with a scalable, future-ready, and flexible environment

# ZENTIVA

## Industry

Life Science / Pharmaceuticals

## Region

Global, with headquarters in Czech Republic

## Company Size

4,500 collaborators

## Cloud Partner

Microsoft Azure

## Solution

SAP S/4HANA on Azure

“There are many options for designing the SAP S/4HANA environment in Azure, so we needed experts who have expertise in both Azure and SAP. Atos's expertise has proven key to implementing SAP S/4HANA in Azure and has provided innovative ideas and clear guidance in designing the right solution for us.”

-CIO, Zentiva
