

Customs Capture for postal and logistics companies: efficiency, economy, security

Atos

Your customs challenges

The huge shift to e-commerce has put more pressure than ever on postal authorities and international logistics companies.

Electronic data capture has been ramped up for growing mail volumes, with a critical need to capture customs data accurately and efficiently.

Growing and changing regulatory requirements

Security threats

Collection of duties

Many modern companies have the capability to automatically read recipient and sender information. Yet when parcels require custom clearance, you also need to capture:

Sender telephone number and email

Item details
(description, quantity, category, weight and value of contents)

Country of origin

Trade tariff code (in the EU).

Reading labels can be challenging

Difficulties locating or deciphering a label can be compounded by irregular-shaped mail, wrinkles or folds. If labels can't be read by machine, data has to be entered manually, which is costly and time-consuming.

This is where Atos can help.

Customs Capture with Atos

Every package, every time

We'll help you automatically capture every piece of customs data to meet your regulatory requirements, reduce security risks and enable collection of the right duties.

By bringing you the highest levels of performance and efficiency, we'll help you improve your bottom line.

Our proven data capture solution uses complex algorithms, combined with advanced image processing, machine learning and highly efficient Optical Character Recognition, to produce the right results every time. Any data that is not automatically read is video-coded.

All data is then ready for transfer to the destination country, the origin country, the Customs Agency, and to your IT team for further analysis and use.

Customs Capture can be deployed on high-speed sorting machines and on mobile devices at the counter. It's available on-premise or you can take advantage of Atos' Hosting and Infrastructure services.

Customs Capture that's right for you

With our cost-effective and future-proof platform, you can develop, innovate and scale as your business and technologies evolve.

Unique flexibility and scalability

Open interfaces to your sorting equipment and hardware/software platforms, and between software modules, means you can:

- Easily customize or modify modules to improve performance, for instance to enhance detection capabilities
- Integrate Customs Capture seamlessly with your sorting machines and equipment
- Avoid vendor lock-in because you're free to choose best-of-breed components for processing parcels.

Customs Capture workflow is modular and configurable, so it's fast and easy to change or reprioritize processes to meet your changing needs.

With our web-based Video Coding, data entry can be from anywhere, so you can use multiple keying sites or outsourcing arrangements.

Cost-effective and efficient

With Atos' Customs Capture you will:

- Collect more of the data required for regulation and duties
- Improve collection of customs fees
- Rely less on manual data entry
- Optimize use of your current assets
- Boost your bottom line.

Why choose Atos?

Shaping the post of tomorrow

Atos has been helping postal operators and logistics companies all over the world to meet operational and competitive challenges through digital transformation. We know the industry intimately, and the technology drivers that deliver success.

With an extensive IT portfolio, we're a leading global systems integrator working with all major postal sorting machine suppliers and partners. We'll work with you to understand your needs and deliver the solution that's best for you.

About Atos

Atos is a global leader in digital transformation with 105,000 employees and annual revenue of over € 11 billion. European number one in cybersecurity, cloud and high performance computing, the Group provides tailored end-to-end solutions for all industries in 71 countries. A pioneer in decarbonization services and products, Atos is committed to a secure and decarbonized digital for its clients. Atos operates under the brands Atos and Atos|Syntel. Atos is a SE (Societas Europaea), listed on the CAC40 Paris stock index.

The [purpose of Atos](#) is to help design the future of the information space. Its expertise and services support the development of knowledge, education and research in a multicultural approach and contribute to the development of scientific and technological excellence. Across the world, the Group enables its customers and employees, and members of societies at large to live, work and develop sustainably, in a safe and secure information space.
