

# Atos Engaged Employee Experience Platform

## ENGAGEMENT

### Design & Adoption

Designing a workplace that drives engagement with Experience Design, Agile Transformation, Change & Adoption – all in a data-driven consultative approach from change to enablement.

### Employee Engagement Services

Turn a daily grind into an engaging experience with Voice of the Employee, superior service delivery, focused on the employee's points of need for safer and smarter workspaces and campus facilities.

### Safe and Smart Physical Spaces

Transform the physical workspace into a safe environment for frictionless collaboration with smart meeting rooms, intelligent capacity management, and smart building technologies.

## PLATFORMS

### Collaboration Reimagined

Empowering employees with modern collaboration tools, platforms and workflow automation. Enabling real-time collaboration and fostering Citizen Developers to remove information silos and drive productivity.

### Secure Flexible Working

Revolutionizing how we handle workplace management with modern management tools, Device-as-a-Service delivery and Zero-Trust security best practices all wrapped into one seamless approach.

### Proactive & Data-Driven

Putting data at the heart of the employee experience with data-driven analytics to understand journeys and get insights which we commit to with outcome-based management e.g. with XLAs.

### Intelligent Care Center

Embedding real-time intelligence at the heart of end user care. A new generation of users requires a new support experience. We take an omnichannel approach to supporting them wherever they are, whatever their devices are.

## VALUES

### Digital Inclusion & Accessibility

We bridge the gap between humans and the digital world to enable everyone to achieve their full potential through an end-to-end Inclusive User Experience (IUX) leveraging a range of accessible, assistive technology services.

### Decarbonized Workplace

Whether as a consulting project, or as part of a DLA (Decarbonization Level Agreement) baked into a long-term contract, we'll work with you to help reduce and offset carbon in your workplace services.
