The Atos and Oracle global strategic alliance

Transforming your business into an agile digital business

Today, businesses are transforming quickly to adapt to our rapidly-changing environment. They are exploring new, more innovative ways to achieve operational efficiencies, become more customer-centric and save costs. Atos and Oracle have worked closely with many organizations throughout these changing times, to solve their most critical business challenges.

Our global strategic alliance combines the strength of Oracle's business software solutions with Atos' expertise in consulting, systems integration, and managed services. We also have a dedicated infrastructure and data management team that specifically handles delivery of hardware services. Together, our combined team of expert consultants is helping clients derive greater value from their technology investments.

Atos and Oracle: Creating new business opportunities

Strategic focus on Oracle solutions

Atos' Oracle solutions have a sharp focus on innovation and automation. We build customized tools, accelerators and transformation assets to accelerate your transformation journey. A strategic element of our global portfolio is using a common design and delivery methodology across the globe.

Investments in Oracle technologies

We have built a dedicated global Oracle practice dedicated to building innovative solutions for our clients, supported by 1,900+ consultants trained on Oracle technology and applications.

Platinum Oracle partnership

Atos is an Oracle Global Platinum Partner, which gives us exclusive access to expert resources to help design and deploy high-quality end-to-end services and solutions.

360˚ degree solution

Atos delivers end-to-end services, combining consulting, systems integration and managed services expertise with Oracle applications and technology.

World-class IP

Atos employs a suite of in-house tools, solutions, accelerators and utilities in combination with Oracle technologies to speed up implementations, upgrades, development and rollouts.

Multi-industry focus

Atos domain experts bring their knowledge and experience to a broad range of industries like manufacturing, retail, logistics, banking & financial services, insurance, healthcare, telecom and media. Atos has successfully delivered some of the world's largest Oracle engagements in Oracle Cloud, Siebel, PeopleSoft, EBS, Fusion and Business Intelligence.

Create an advanced application stack and stay ahead in the digital journey

Companies have been using legacy applications for decades, but digital technologies have altered the business landscape. Legacy applications are no longer compatible with the new digital ecosystem, which impacts business growth.
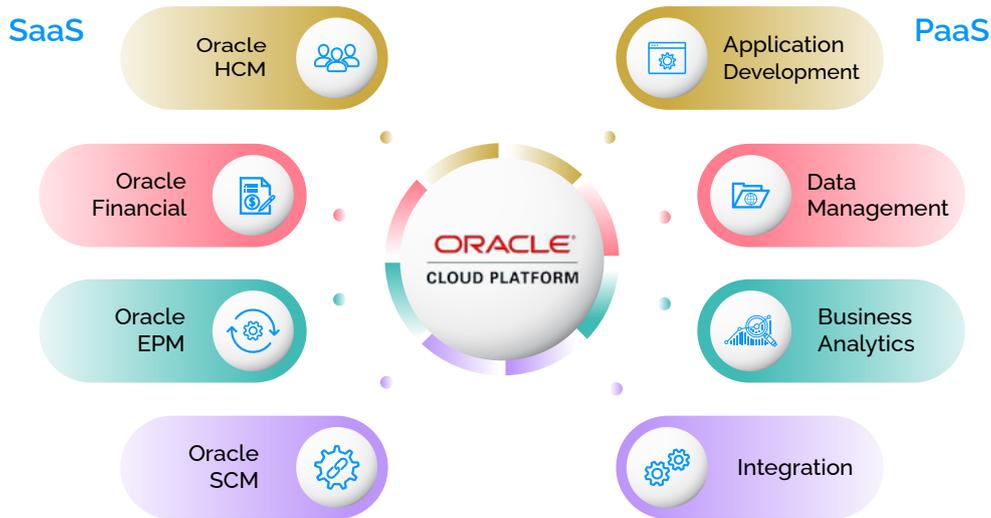

To stay competitive in an increasingly saturated marketplace, organizations are now in a race to operate at increasing speed, with greater precision and flexibility. Faster time-to-market and

responsiveness are driven by technology that delivers best-in-class performance and supports agility across the enterprise. Atos Oracle application transformation solutions ensure that you stay ahead of the competition by making your business more agile. We help lower ownership cost, create secure, scalable and integrated systems, and provide real-time analytics to drive business excellence.

ORACLE | AtoS

PaaS

- Application Development
- Data Management
- Business Analytics
- Integration

Consulting Expertise	Alliances	Proven Methodologies	Digital Lab & CoEs	Accelerators	AI / ML / IoT enabled offerings

How do you benefit?

The Atos approach combines business and technology expertise to accelerate the entire process — from **idea to implementation.**

Reduced downtime

With a self-driving, self-securing and self-repairing autonomous database, you can recover much faster from outages and improve business continuity

Better scalability

Ramp-up your solution to enable business expansion without disruption. Oracle ERP Cloud supports complex integrations as well as bulk data movement.

Improved efficiency

Accelerate application delivery with Oracle's DevOps portfolio so you can take products and services to market faster.

Greater agility

With low-code cloud products and pre-built integrations, Oracle ERP Cloud enables you to quickly implement new functionality and focus on rapid innovation by responding faster to changes in the business environment.

Improved financials

Oracle ERP Cloud has no up-front license costs and lower maintenance costs than Oracle EBS. The pay-as-you-go model reduces overprovisioning and enables the move from fixed to variable cost to reduce total cost of ownership.

Automatic upgrades

Oracle ERP Cloud gets continuous, automatic software updates, compared to Oracle EBS, which requires significant time and effort to upgrade.

More options

Oracle Cloud Marketplace is an online store designed to help you take advantage of Oracle's growing ecosystem of partner applications and solutions.
