Value-based care and population health workshop

"Population health isn't embedded within the organization; its still seen as another program tacked on to the core business." VP of Population Health

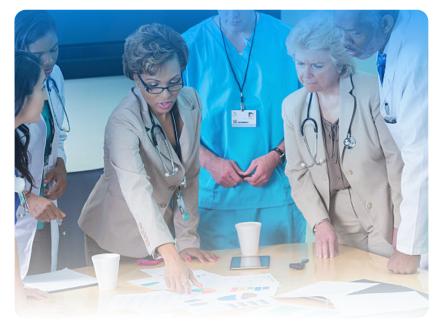

Fourteen years ago, The Institute for Healthcare Improvement (IHI), introduced its Triple Aim initiative to decrease costs, improve clinical outcomes and enhance the patient experience. Unfortunately, healthcare systems are still struggling to hit their clinical and financial outcomes. The COVID-19 pandemic has only added additional financial burdens to an already slim margin and cost over-run industry.

We understand the evolving world of healthcare and the challenges to align new digital capabilities while addressing market competition, revenue and cost pressures. Atos helps healthcare organizations to realize opportunities through:

- · 24x7 personalized care
- Outcome-led models of care such as (quality program initiative name)
- Revenue and cost control operational models
- Risk and compliance management programs
- Provider-payer collaborations

We partner with market-leading digital health solution providers to help address the challenges of population health and valuebased contracting ensuring your organization can achieve strategic goals and hit critical targets.

This complimentary workshop will promote organizational objectives and provide a strategic plan and tactical next steps for success.

Why invest the time and effort?

Discovering insights in your current organizational performance and aligning improvements around priorities will help you achieve future clinical and financial targets - and this is where we begin.

Opportunities such as the following will be discussed:

 Understand comprehensive organizational efforts focused on improved quality, reduced cost, and engaged patients and providers

- Identify opportunities to leverage digital approaches to:
 - · Advance capacity toward precision medicine
 - Maximize the use of population health technologies to improve care collaboration and manage population health of the community you serve.
 - Define consumer-centric approaches to promote access to care and patient engagement.
 - Identify new service offerings to drive increasein gross patient revenue.
- Identify potentially new service offerings to drive increased Gross Patient Revenue

Approach

Pre-Workshop

- Your organization's executive sponsor will work with your dedicated Atos executive account leader to provide a baseline of current organizational priorities and efforts related to population health, ACOs, and other value-based care initiatives using the VBC Maturity Model.
- Together will we identify organizational leaders who will be invited to the workshop.
- Atos will complete an analysis of organizational priorities and provide recommendations at the workshop

Workshop

- The workshop will take approximately 2 hours and will be facilitated by the Atos Value-Based Care Solutions team
- The workshop agenda will be agreed with you in advance and will also include the following:
 - Review current state of organizational readiness and alignment related to data aggregation and analytics, organizational governance and culture, patient and provider engagement strategies, and care model approaches.
 - Prioritisation of organizational needs and alignment to the organizational strategic plan and goals, based on data reviewed during the pre-workshop phase.

Post-Workshop deliverables

- Organizational performance assessment based on the Five VBC Domains within Atos VBC Maturity Model (levels 1-6)
- 12 month road-map to achieve top three strategic objectives identified during pre-workshop analysis (detailed steps beginning with first month)
- Atos will provide a summary of the workshop discussion as well as key recommendations based on Atos' experience.
