

# Empowering engaged employee experience

€35.73B

total estimated digital workplace revenue by 2023

What's happening now?

21.7%

expected growth in digital workplaces over the next five years

Our ways of working are changing dramatically.

Speed and agility requirements are growing exponentially in a connected world.

More global businesses are moving to digital and hybrid working environments.

## But there's a challenge...

Suddenly shifting to a remote-working format can affect a company's performance and productivity. 66% of survey respondents said that "employees burning out and leaving our company" had become more significant since COVID-19.\*

80%

of organizations in 2020 had to accelerate their remote workforce strategy\*

65%

had to rapidly piece one together\*

## The solution

Atos and VMware partner to transform the employee experience. We've enabled employees to effectively work together, collaborate and develop ideas.

70%

of business leaders agree that employee engagement is critical to achieving business results (Gartner)

Together we unite to empower businesses and help them excel in the current and future digital workplace.

175K Workspace ONE UEM users/devices

12.5K virtual workplace users

10+ year partnership

## How?

VMware's Workspace ONE technology, combined with Atos Digital Workplace, provides a secure and intuitive "end-to-end" experience that improves productivity for end users and the IT teams that support them.

### Case study

Global manufacturing company based in Germany

Atos and VMware helped with a full information technology outsourcing (ITO), including workplace, service desk, and on-site services, all over the world. Implementation of experience level agreements (XLAs), modern management, and end-user computing (EUC) analytics were also carried out.
