Qualys HealthCare Case-studies

American Specialty Health

BUSINESS: ASH provides complementary health benefits, fitness, and health improvement programs for 13 mil members across USA.

PROBLEM TO SOLVE: Cost-effectively achieve ongoing IT security and regulatory compliance risk mitigation for its own network and new company acquisitions.

OPERATIONAL CHALLENGE: ASH doesn't have a staff dedicated to IT security; as a result, its IT director and system administration team need the most automated way to keep its systems secure and compliant.

WHY THEY CHOSE QUALYS: Qualys provides ability to centrally manage the cyber-security risks associated with all of ICT assets, and quickly identify and remedy those that are out of policy, misconfigured, or otherwise vulnerable.

QUALYS PRODUCTS: VMDR+PM+PCI-DSS, scope +1000 ICT

American Specialty Health.

About American Specialty Health

ASH provides health plans, employer groups, insurance carriers, and trust funds with a wide range of **population health management, fitness and exercise, and specialty health care management** programs to improve the health of their members or employees.

[Learn More](#) [Our Story](#)

Catholic Health System

BUSINESS: Health care services provider in New York

PROBLEM TO SOLVE: Identify, secure and maintain more than 6,000 ICT assets to meet internal and regulatory policy compliance.

OPERATIONAL CHALLENGE: It's challenging to keep the infrastructure secured at 20+ locations. In past, the IT team wasn't always certain what devices and systems were in use, both from a personal computing perspective and because many clinical devices are attached to its network. "In addition to desktops and laptops, there's also the concern of the security posture of all of the smartphones, tablets, and other devices entering our locations and seeking network access.

WHY THEY CHOSE QUALYS: no software or hardware to install and maintain. Because Qualys is centrally managed, all of its vulnerability data and system updates are made in real time and summarized & prioritized on 1 dashboard for fast actions.

QUALYS PRODUCTS: AV+VMDR+POL, scope +6000 ICT

The University of Chicago Medical Centers

BUSINESS: The University of Chicago Medical Centers (UCMC) is a nonprofit corporation providing medical care to residents of the Chicago metropolitan area and beyond. 9,500+ employees.

PROBLEM TO SOLVE: Consolidate multiple vulnerability management solutions, across multiple locations, and to provide security and IT operation teams, as well as business managers, with centralized ICT risk and regulatory compliance reports.

OPERATIONAL CHALLENGE: UCMC's IT infrastructure supporting 4 separated IT teams consists of a +5000 thousand servers and about 11,000 individual networked devices

WHY THEY CHOSE QUALYS: The Qualys Platform automates and unites vulnerability management and policy compliance across multiple locations in organization. Achieved continuous vulnerability management with high accuracy rate. Streamlined workflow with integrated remediation ticketing system improving overall security and HIPAA compliance.

QUALYS PRODUCTS: AV+VMDB+POL, scope +16,000 ICT

The screenshot displays the UChicagoMedicine website. At the top, there is a navigation bar with the UChicagoMedicine logo and the tagline "AT THE FOREFRONT". Below the logo are three main navigation categories: "Patients & Visitors", "Healthcare Professionals", and "Research & Clinical Trials". A search bar is located in the top right corner, and a phone number "1-888-824-0200" is displayed below it. The main content area features a hero section with the text "Tougher. Stronger. Smarter." and a "Learn More" button. Below this is a row of four medical professionals in scrubs. At the bottom of the hero section are three buttons: "Find a Condition or Service", "Find a Doctor", and "Find a Location". Below the hero section is a map of Chicago with several location pins. A sidebar on the left of the map contains three options: "All Locations", "Urgent Care", and "Hospitals".

Children's Mercy Hospitals

BUSINESS: Leading pediatric centers in the USA, children travel from 46 states and 17 countries to Children's Mercy Kansas City. The organization's 8,200 employees include 786 pediatric specialists, who consult on +19,200 surgical cases each year.

PROBLEM TO SOLVE: The company needed to achieve clearer visibility of cyber-security exposure of +40.000 ICT assets and more actionable prioritization of remediation steps.

OPERATIONAL CHALLENGE: Heterogeneous infrastructure with mix of Windows, Linux and MacOS as well as various active network devices. Periodic monthly network scans could not cope with scope and dynamics of attack surface and threat landscape.

WHY THEY CHOSE QUALYS: Offers real-time vulnerability data on thousands of endpoints using Qualys Cloud Agents. Enables effective prioritization for remediation work, cutting the total number of vulnerabilities by 85% within 18 months. Provides easy-to-digest reports, helping to boost engagement in security activities
