Use case: **Financial Department**

Helping a Danish public institution

automate invoice processing

09/2019

Atos

Business challenge

- Around 600.000 invoices per year

- Manual classification of invoices in SAP by 45 FTEs

Our solution

- Use RPA to process invoices

- Add Machine Learning to classify invoices

- Use Process orchestration in SAP for invoice handling

Business value

- Up to 70% of all invoices in scope can be automatically handled

- Quality improved to 99%+ accuracy of classification

Team: 6-8 FTEs | **Duration:** 5 months from PoV to production | **Estimated ROI:** 1m€ in yearly savings

Atos

Thank you
