AWS and Atos Strengthen Collaboration with New Strategic Partnership to Transform the Infrastructure Outsourcing Industry

Leader in managed infrastructure services signs industry-first agreement with AWS to help customers drive cloud migrations and accelerate their digital transformations

LAS VEGAS and PARIS—Nov. 30, 2022 — At AWS re:Invent, Amazon Web Services, Inc. (AWS), an Amazon.com, Inc. company (NASDAQ: AMZN), and Atos (EPA: ATO), a global leader in digital transformation, high performance computing and information technology infrastructure, today announced a Global Strategic Transformation Agreement that enables Atos customers with large-scale infrastructure outsourcing contracts to accelerate workload migrations to the cloud and achieve digital transformation. The multiyear, industry-first agreement extends the strategic relationship between Atos and AWS, with Atos selecting AWS as its preferred enterprise cloud provider and AWS naming Atos as a strategic partner for IT outsourcing and data center transformation. This agreement provides business and technology advisory, digital engineering, and managed services to Atos’ customers to accelerate their journeys to the cloud. AWS will also work with Atos to develop and deliver new industry solutions for IT outsourcing and data center transformation to customers globally, as well as to upskill Atos’ workforce and drive efficiencies in its data center, cloud, and security operations, including selective migration of legacy data centers and IT hardware assets.

As part of the agreement, Atos will proactively consult with more than 800 managed infrastructure services customers spanning the globe to offer a new managed, hybrid-cloud service portfolio that features the option to move selected workloads to AWS. The offering will include highly industrialized migration methodology, solution accelerators, and the companies’ combined expertise in large-scale cloud migrations to support customers as they adopt and move their workloads to AWS. Atos’ customers will be able to leverage the breadth and depth of AWS’s portfolio of services—including analytics, compute, databases, machine learning, and storage—and Atos’ expertise as a Global Systems Integrator to benefit from the flexibility, security, resilience, innovation and sustainability offered through the cloud.

As part of the strategic partnership, Atos’ employees will also be trained on AWS, scaling up their skills and knowledge to continue supporting customers on their digital
transformation journeys. Over the next three years, Atos plans to train its employees to achieve more than 20,000 AWS certifications in order to expedite customers’ cloud adoption and help them leverage the advantages of the cloud.

“We are proud to strengthen our partnership with AWS in a first-of-its-kind collaboration, which is transformational in both its approach and its impact on our customers and the IT outsourcing industry. In addition, this partnership represents another significant step in Atos’ transformation,” said Nourdine Bihmane, Co-CEO in charge of the Tech Foundations Business line at Atos. “As a trusted partner, we are offering our customers the opportunity to accelerate their migration to AWS’s powerful, proven, cost-effective, and scalable cloud infrastructure, while supporting them in their digital transformation journey.”

“This marks the beginning of a significant transformation of the infrastructure outsourcing industry. Through our collaboration, Atos’ customers will be able to realize the benefits of moving to the cloud, including reduced operating costs and carbon emissions, as well as increased business value and accelerated digital innovation,” Ruba Borno, vice president, Worldwide Channels & Alliances, AWS. “We’re excited at the opportunity to work with Atos to upskill their workforce, helping to expand their expertise in cloud technologies so they can enable customers to build, develop, and innovate on the world’s leading cloud.”

“We are delighted to hear that Atos has signed a new strategic agreement with AWS. Having been our strategic IT partners for many years, the announcement further demonstrates Atos’ and AWS’s commitments to maximizing the potential of moving critical systems to the public cloud in terms of agility and cost effectiveness, all while minimizing environmental footprint.” Peter Brown, director of IT Operations and Infrastructure, Britvic.

Britvic is a UK headquartered corporation that makes drinks in Great Britain, Brazil, France and Ireland and exports to more than 100 countries around the world. It owns major soft drinks brands including Robinsons squash, J20 and Fruit Shoot, and is the PepsiCo bottler in the UK.
