

Expand YOUR Horizons

Take your SAP environment to the next level

With Atos and SAP on Microsoft Azure

Looking to shift your SAP environment into the cloud? We help enterprise-level organizations around the world boost their agility and responsiveness while mitigating the risks, challenges, and concerns associated with SAP on public and hybrid clouds.

With Atos and Microsoft SAP Cloud Services, you can be confident of not only a smoother transition and optimized operations and insights, but that you'll be as safe in the cloud as you have been on-premise.

How you will benefit

Atos' Digital Cloud Transformation Hub wfor SAP and Microsoft Azure combine expertise, leading technologies, pre-defined solutions, and tools into a single modular suite, to accelerate the adoption of SAP on the cloud in a way that delivers maximum value and the least amount of risk.

You'll be able to:

Transform your business to optimize existing resources and unlock powerful new capabilities for your enterprise.

Create a solid foundation for the cloud and connect to a Cloud-Forward future.

Innovate with confidence while securing operations in the cloud.

Enable the integration and collaboration needed to ensure the best business outputs and a frictionless user experience.

How we do it?

Scale as required and achieve greater agility and resilience with SAP - hosted by the only cloud provider that's been running SAP for its own finance, HR, and supply chains for the last 20 years, including SAP S/4HANA.

Atos SAP on Microsoft Azure offers you:

Dedicated SAP cloud solutions

- The Atos Digital Transformation Hub for SAP, specifically designed to help you drive risk-free adoption and help you utilize the full potential of cloud and S/4HANA. Incorporating our dedicated Atos SAP management toolset, Atos SAP BlueBox.
- Hyperscaler approved processes

Atos not only offers recognized leadership in cybersecurity, digital workplace, decarbonization, and cloud, we are currently part of the SAP Rise Programme ourselves.

This means we are well acquainted with all the processes, challenges, and requirements that come with deploying SAP on Microsoft Azure. It's also given us first-hand insight into user and business expectations, which we have built into our offering.

Next steps

Atos offers a comprehensive assessment for SAP on Microsoft Azure. It's the ideal first step to ensure the best possible transformation to cloud for your SAP environment.

The assessment involves a deep dive into your technical landscape. The four-week discovery and analysis process will provide you with everything you need to pursue your cloud aspirations, customized to your unique requirements. The intent is to help you define your strategy and next steps to empower you to have informed conversations with your internal stakeholders, articulate a business case, and seek out the funding needed in cloudification.
