- 03** Volunteer Portal (Workforce Management) 11

01

**Accreditation
system (ACR)**

#SouRio2016

Rio2016

Rio2016

Accreditation System (ACR)

The Accreditation System,

It will allow to validate people carrying an accreditation through their photograph, and at the same time confirm that they have the necessary privileges and permissions.

Centralizes the management of all participants, ensuring that each participant has been validated and can participate in the event,

It allows the use of any type and format of passes, based on different formats such as cards, laminated paper, etc.

Security systems based on barcodes, QR and RFID can be included.

System tested in world events such as the Olympic Games since 2002 with the most rigorous security processes where it is integrated with security forces and allows the use of accreditation as a visa.

Features

Easy-to-use enterprise application based on web access

Integrated the highest standards of cybersecurity.

Possibility of integration with existing customer systems

Fully configurable and flexible

Storage secure data

Multi language

Ease of data extraction and report generation with office tools

User profiles flexible and configurable

For all types of projects: from small conventions to large international events.

Consulting

- Provision of the system ready for use:
 - Accreditation design, including photography, anti-fraud measures, barcode, QR, RFID...
 - Definition of functions, roles of all participants and privileges (access, transport, etc.)
 - Creation of the privilege matrix assigning roles with privileges
- Training with our experts in the accreditation business
- Hosting the system in the cloud, offering all the necessary flexibility with the highest levels of security.

Benefits

- Easily customizable solution to a customer's needs
- Allows the badge to be matched with access permissions
- Security reinforcement
- Reduction of fraud, error and admission time.

Accreditation System (ACR)
