Digital Advisory - Your journey to net-zero

EVIDEN net-zero portfolio

Using insight, digital transformation and carbon projects to build a net-zero future

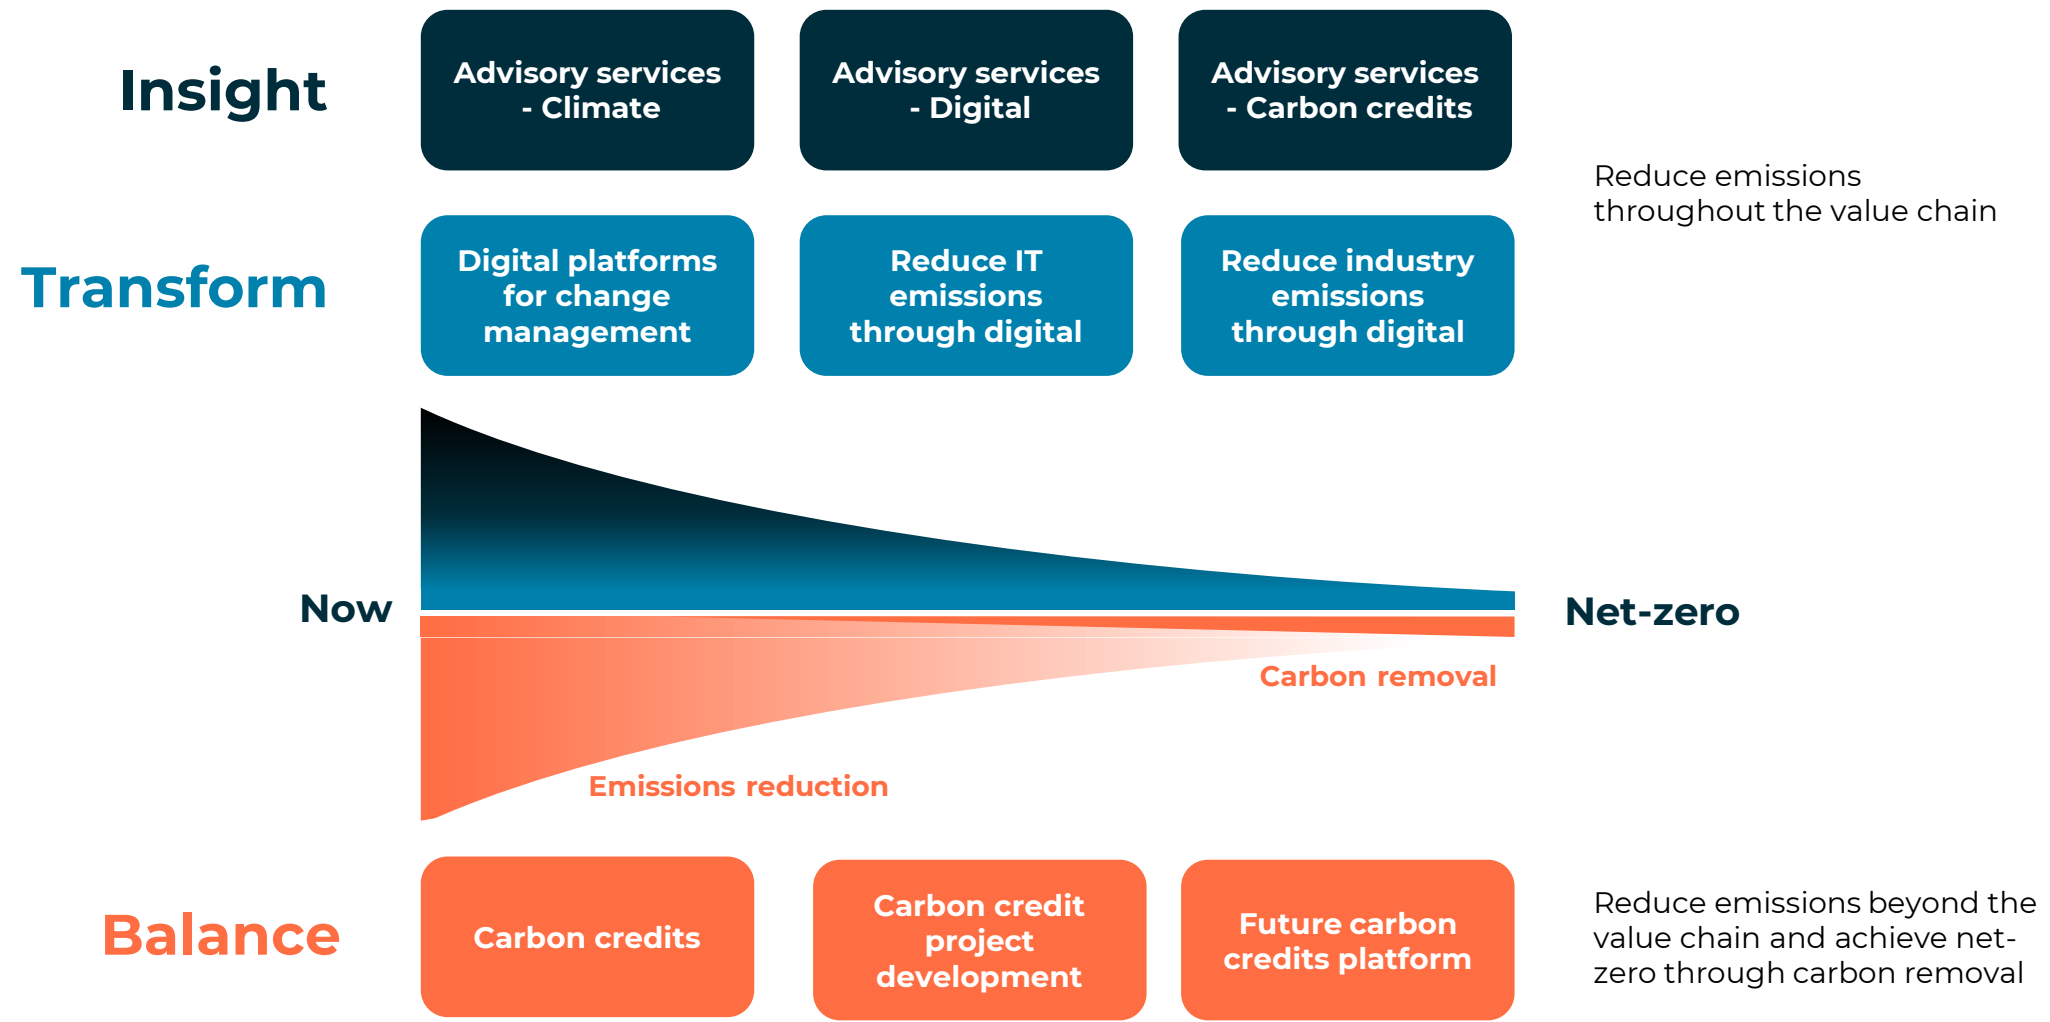

Our ambition is to reach net-zero emissions by 2039¹, 11 years ahead of the Paris Agreement commitment

¹: Atos net-zero target currently under review in line with latest [Science Based Target initiative definition](#)

EVIDEN can help at each stage of your net-zero journey

EVIDEN net-zero portfolio – services overview and examples

Insight

Advisory services - Climate

- Science-based net-zero target setting
- Climate risk and opportunity analysis
- Value chain decarbonization

Advisory services - Digital

- Digital Decarbonization Assessment
- Digital emissions management

Advisory services – Carbon credits

- Bespoke carbon credits strategy
- Feasibility assessments

Transform

Digital platforms for change management

- CRAFT for carbon trajectory forecasting
- CIEL for physical climate risk management
- Green app and CSR app

Reduce IT emissions through digital

- Decarbonization Level Agreement
- Low carbon HPC, Cloud, Workplace, IoT ...

Reduce industry emissions through digital

- Digital twins, Smart factory, Smart Grid
- Connected vessels, Smart City, Terra2

Balance

Carbon credits

- Certified credits from high quality projects
- Emissions reduction projects
- Carbon removal projects

Carbon credit project development

- Whole or a share of a project that will generate carbon credits, including monitoring and evaluation

Future carbon credits platform

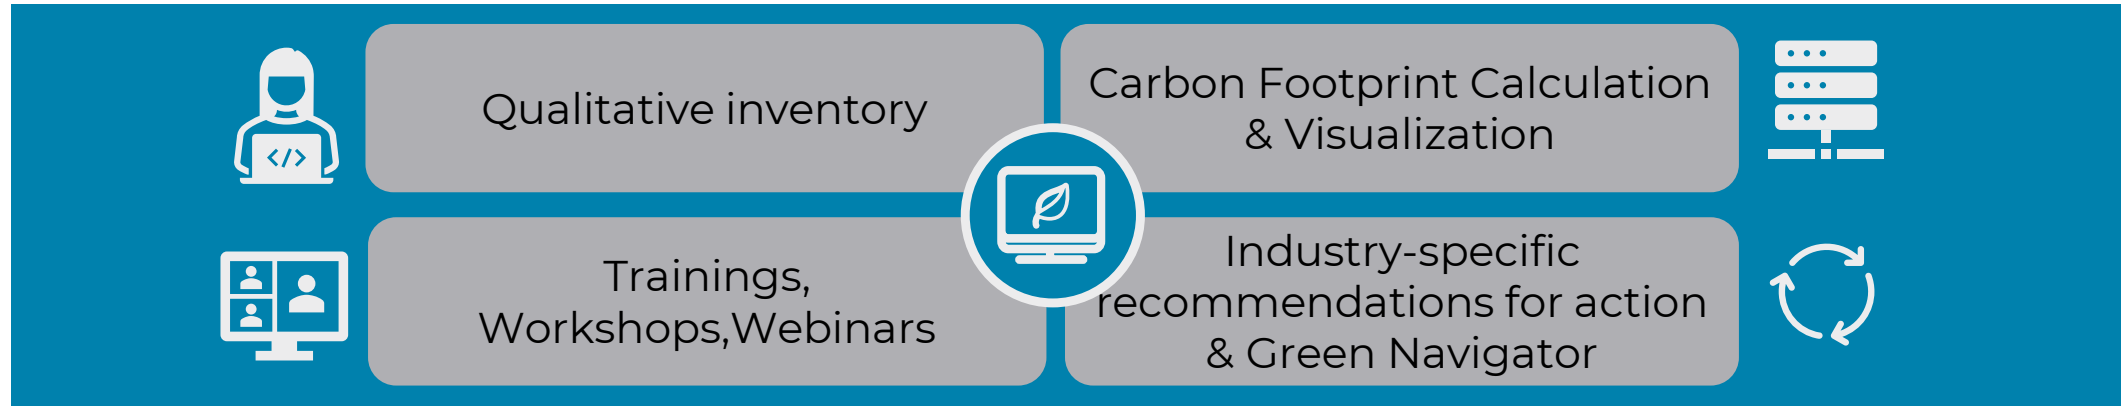

- Online platform to make one-off purchases of carbon credits easier and manage carbon offsetting strategy

EVIDEN Digital Advisory

At a glance...

Insight

Understand and measure current IT emissions

- Digital Decarbonization Assessment
- Usage Management Software & E-Medien
- Usage Management Peripherie

Transform

Effective reduction of IT emissions in all areas

- Green Datacenter
- Sustainable Digital Workplace
- Sustainable Software Development
- Green Navigator

Balance

Compensation of remaining emissions through offsetting

- Offsetting through compensation projects
- Purchase of carbon credits
