

# Treasury and capital market Fusion Summit

Solves the many challenges of today's markets with a powerful and fully integrated, front-to-back solution. Significant change in capital markets, particularly in the area of OTC derivatives and growing regulatory requirements have required considerable investments in the supporting processes needed.

Fusion Summit is a proven, award-winning solution in the Over-the-Counter (OTC) derivatives market, leveraging over 25 years of market expertise. More than 160 of the world's top banks rely on Fusion Summit to support their trading desk activity. The solution offers a functionally rich core trading solution for capital markets that supports business growth, improves Straight-Through Processing (STP), shortens time to market while reducing costs.

## Accelerate time to market

With Fusion Summit, you can gain a competitive edge in the market and build and price new structured trades quickly and efficiently. The solution provides real-time processing of a wide and continually expanding range of financial instruments.

## Better decisions in real time

Fusion Summit enables you to monitor spreads, perform what-if scenarios, check credit lines, and make better informed decisions. Real-time blotters provide you with immediate views of the trading position with immediate access to the underlying trades.

## Structured trading

With Fusion Summit, it becomes easy to create structured products from multiple underlying assets including interest rate, credit, bonds, FX, equity, commodity, and inflation. Traders can use templates to create commonly traded structured products easily and quickly while benefiting from full integration with your operational workflow and risk management procedures.

## Vanilla and structured fixed income

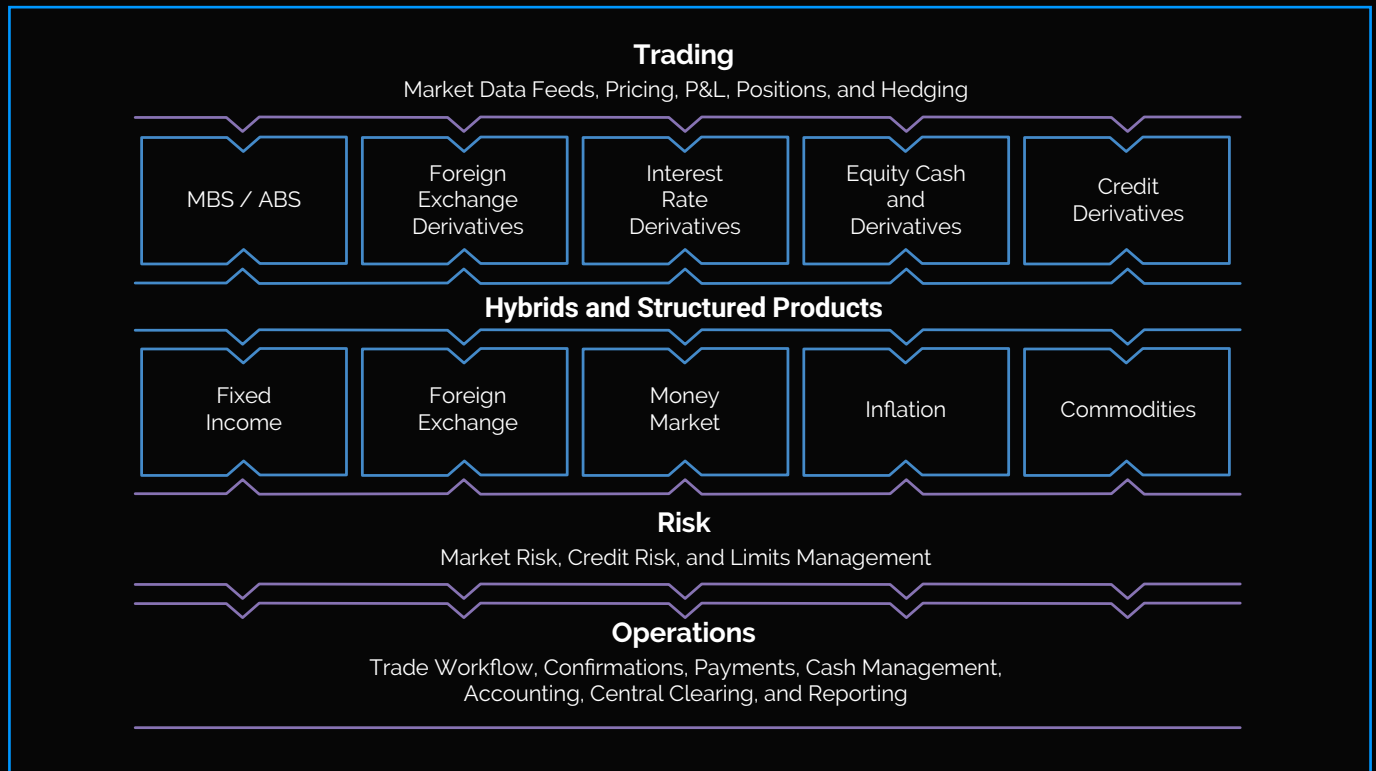

The solution meets the fixed income demands of bond dealers, issuers, market makers, and treasurers. Fusion Summit covers a wide range of security instruments ranging from an extensive range of bonds and repos through to mortgage- and asset-backed securities (MBS and ABS).

# “Fusion Summit offers a functionally rich core trading solution for capital markets”

## Efficient Operational Workflow

Fusion Summit captures the lifecycle of all instruments and streamlining operations enables a 50% reduction in internal support costs. The solution automates the workflow from confirmation generation, settlement messaging, and payment processing through to real-time trade position viewers and accounting.

## Connectivity

The system easily integrates with existing infrastructure thanks to a range of connectivity tools including real-time off-the-shelf interfaces for industry standard systems, and other Finastra micro-services and solutions.

## Scalability

Fusion Summit is a flexible solution that can grow with your business. It combines real-time, n-tier distributed processing capabilities with the .NET smart client technology. Fusion Summit supports the capital markets operations of sophisticated environments.

## Components and Micro-Services

A range of components and micro-services integrate with Fusion Summit to build a powerful global solution with business-wide functionality across all trading desks for both Finastra and non-Finastra systems.
