

Atos (Eviden) positioned as a Challenger in the 2023 Gartner® Magic Quadrant™ for Public Cloud IT Transformation Services

Paris, France – September 21, 2023 – [Eviden](#), the [Atos](#) business leading in digital, cloud, big data and security today announces that it has been positioned as a Challenger in the 2023 **Gartner Magic Quadrant for Public Cloud IT Transformation Services**, based on its completeness of vision and ability to execute.¹

“Providers in the public cloud IT transformation services (PCITS) market offer solutions designed to deliver transformational outcomes via cloud-native professional and managed application services hosted exclusively on public hyperscale cloud infrastructure and platform services.”

While there are many providers that have cloud modernization capabilities, this Magic Quadrant offers a view of providers more specifically focused on IT transformation through the use of public cloud services.

Michael Liebow, Head of Cloud, Eviden at Atos Group said *“For the second year in a row, I am pleased to see Eviden positioned in Gartner view of service providers for public cloud IT transformation services. Eviden offers clients a robust cloud offering, reinforced by state-of-the-art global cloud centers for engineering, migration, operations and security, is central to our value proposition for clients to embrace the whole spectrum of cloud services, and for a consistent delivery experience. Over the past year we have reinforced deepened our capabilities across all three hyperscalers to help our customers realize the promise of cloud, no matter which public cloud provider.”*
