Our partnership

Official Information Technology Partner

8-year partnership is unprecedented in the scope of support for UEFA and its competitions

Context: as football competitions become more connected and more widely viewed across Europe and beyond, a strong technology partner will aid UEFA to face technological challenges and continuously introduce efficiencies and innovations.

Atos mission: Helping UEFA manage, improve, and optimize its complex technology landscape and operations with the overall aim of organizing and supporting national team football events over the coming years.

More than **200 Atos expert** will work on this project

What we deliver

Solution Overview

Transition and transformation phase

Build a **solid foundation** and a **trusting relationship** to last for the duration of the contract

Ensure zero impact on EURO 24 Event

Manage a smooth transition with **no disruption to business**

Dec 2022 – Jan 2024: Transition projects will be staggered to take into consideration UEFA's requested timelines as well as hard dependencies on technical setup, third-party contract termination dates and cross stream interdependencies.

Feb 2024 – August 2024: Euro 2024 delivery

From August 2024: Transformation projects will begin only after all services have been taken over and have reached steady state including:

- Complete Application Migration to the cloud
- SAP Cloud migration
- S4 HANA

Service areas

Delivering services across 6 different areas

Cybersecurity Managed Service

Implementing and operating security services in alignment with UEFA's SecGov strategy. This includes handling the implementation, management, monitoring, and incident response for security services.

ICT Operations

We offer a complete managed service that includes Onsite Support, Remote L1 Support, IT Service Management Process definition and tools, and Service Performance Reporting for all ICT services, regardless of their delivery scope.

Infra. and Cloud Management

Management and operations of onsite infrastructure, workplace services (end user equipment and Nyon Campus network) and Cloud infrastructure.

ICT Solutions

Management and full delivery (including L2 support) of Applications "in scope" and Management and L2 support for applications out of scope, including delivery of new functionalities, modernization of applications and corrective and evolutive maintenance.

Event Planning and Operations

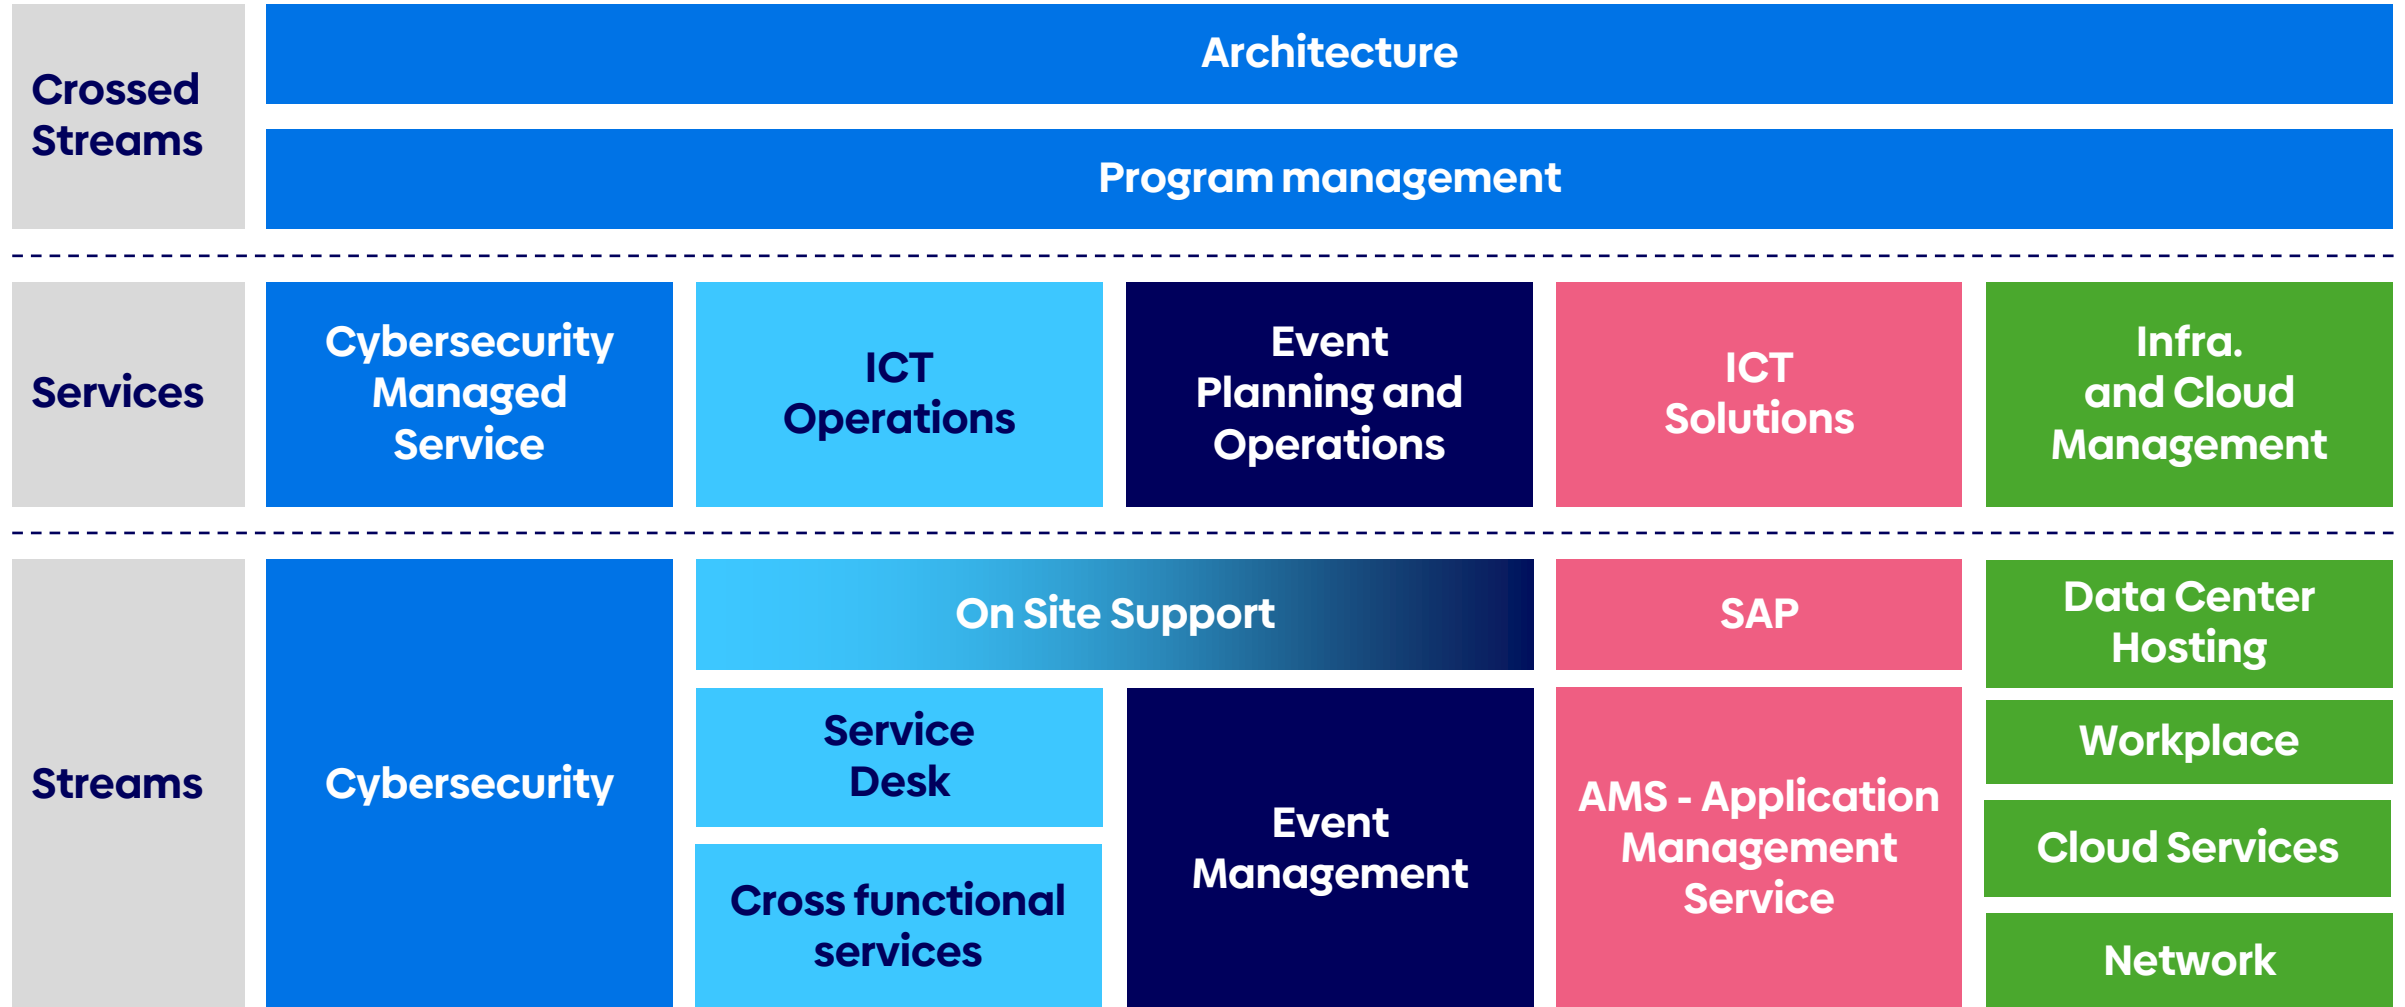

Full management of Nations Team Competition events, from early stages planning, equipment management, operations planning and onsite support for Nations Team events.

Project Management Office

Overall project coordination, knowledge management and consolidated reporting across all services delivered or managed by Atos
