AI ethics and governance
Develop frameworks and guidelines to ensure ethical use

Generative AI platform
Minimize digital waste and accelerate time to value

Microsoft 365 Copilot
## A gamechanger for the future of work

Microsoft Copilot combines the power of large language models (LLMs) with your clients' data. Working alongside Microsoft 365 apps, it provides real-time intelligent assistance to augment human creativity and productivity.

- ✓ Microsoft 365 Copilot has real-time access to the content and context of data
- ✓ It inherits the organization's existing security, compliance and privacy policies
- ✓ Data doesn't leave compliance boundary, and isn't used to train the foundation model
- ✓ Copilot integrates with Word, Excel, PowerPoint, Outlook, Teams, etc
- ✓ Users are in control, deciding what to use, modify, or discard
- ✓ As Copilot learns, it can perform more sophisticated tasks

How Atos helps with Microsoft Copilot
We help your clients plan, prepare, adopt and extend how they use it.

Engage	Assess	Envision	Build	Grow	Evolve
AI & Copilot Advisory Workshop	Get ready for Copilot	Post-Readiness & Pre- Deployment	Deploy & Enable Copilot	Adoption, OCM & Extensibility	Proactive Support
